# INTRODUCTION

StrongHands Masternode is a decentralized cryptocurrency designed to offer multiple financial services to people such as passive income, easy payment methods and tradeable pair at many exchanges and StrongHands Exchange (SHNDX). It was generated through a swap from 3.3 trillion Classic StrongHands Coin (SHND) and is limited to a maximum supply of 15,000,000. The focus of the project is the sports world (i.e. athletes, vendors, and supporters), where the use case of the coin is reportedly supported by mobile apps, smart watches, plastic cards, and PC wallets. The project aims to become 'a significant asset in the masternode market, as inspired by Dash and PIVx'.

The controlled inflation was a deliberate design choice to provide a long term source of passive income. The technology is reportedly revised regularly by the development team in order to maximize security and reliability.

The high cost of financial transactions (administrative paperwork, delays of international transfers), the banking infrastructure in certain part of the world, high inflation of certain currencies, pose many problems in the world economy.

StrongHands Masternode represents a real solution to this situation. In fact, a non-governmental currency not issued by a central bank, would preserve its assets in case of economic crisis.

The currency will benefit everyone by accelerating and reducing the transaction cost of economic trades.

In order to make the use of the coin in daily life, we have established long term partnerships and side projects projects alike essential tools such as online portfolio and masternode hosting platform.

# THE KAIZEN PROTOCOL

Kaizen (改善), is the Japanese word for "improvement". In business, kaizen refers to activities that continuously improve all functions and involve all employees from the CEO to the assembly line workers. It also applies to processes, such as purchasing and logistics, that cross organizational boundaries into the supply chain. It has been applied in healthcare, psychotherapy, life-coaching, government, banking, and other industries.

By improving standardized programmes and processes, kaizen aims to eliminate waste. Kaizen was first practiced in Japanese businesses after the Second World War, influenced in part by American business and quality-management teachers, and most notably as part of The Toyota Way. It has since spread throughout the world and has been applied to environments outside business and productivity.

The Japanese word kaizen means "change for better", with inherent meaning of either "continuous" or "philosophy" in Japanese dictionaries and in everyday use. The word refers to any improvement, one-time or continuous, large or small, in the same sense as the English word "improvement". However, given the common practice in Japan of labeling industrial or business improvement techniques with the word "kaizen", particularly the practices spearheaded by Toyota, the word "kaizen" in English is typically applied to measures for implementing continuous improvement, especially those with a "Japanese philosophy". The discussion below focuses on such interpretations of the word, as frequently used in the context of modern management discussions. In modern usage, it is designed to address a particular issue over the course of a week and is referred to as a "kaizen blitz" or "kaizen event". These are limited in scope, and issues that arise from them are typically used in later blitzes. A person who makes a large contribution in the successful implementation of kaizen during kaizen events is awarded the title of "Zenkai".

Project Team will apply such a Japanese organization way as the crucial purpose in a everyday basis checking all points and bringing the improvements needed to move along and make the coin the most trustable asset in cryptocurrency market

Basically it will be a Masternode Coin where holders will be assured as great value living by monthly gains provided with Full Nodes or Shared Nodes. Coders will constantly revise privacy protocols to assure this position.

With a maximum supply of 15 million coins, full node holders will have decision power under new tracks of SHMN having detached position on Discord Server if wanted.

One full node will give weight to vote in decisions concerning development fund usage, partnerships with shared node services and other applications to be defined. For other community decisions, popular vote will be put through.

The economics behind the project are designed to be stable with a long term vision with incentives to lock great amount of coins and guarantee a chain stabilization, so return of investment (ROI) is to be worked under a inflation of 12% a year maximum.

# COIN SPECIFICATION

|                       |                        |
|-----------------------|------------------------|
| Name                  | StrongHands Masternode |
| Ticker                | SHMN                   |
| Algorithm             | QUARK                  |
| Block Time            | 180 seconds/480 day    |
| Masternode Reward     | 70%                    |
| PoS Reward            | 30%                    |
| Masternode Collateral | 1,000 Coins            |
| Maximum Supply        | 15,000,000 Coins       |
| Minimum Stake Age     | 7 Days                 |
| Maximum Stake Age     | 10 Days                |
| Last PoW Block        | 1,000 Coins            |

## MASTERNODE REWARD SCHEME

| From Block | To Block | Coins/Block | Masternode | PoS  |
|------------|----------|-------------|------------|------|
| 3650       | 13440    | 1           | 0.7        | 0.3  |
| 13440      | 26880    | 1.5         | 1.05       | 0.45 |
| 26880      | 53760    | 2           | 1.4        | 0.6  |
| 53769      | Last     | 5           | 3.5        | 1.5  |

The Masternodes can be easily deployed at platforms such as GinCoin, ZCore and Gentarium. Our GUI Wallets are enabled to have full control of the node, decision to finish the process can be done anytime.

Shared Nodes are available with many partners where users have full responsibility for coins sent.

# **THE SHMN FIVE PILARS**

## **1. STRONGHANDS MASTERNODE PLATFORM**

Users will easily deploy a masternode at website with three basic steps. VPS payment will be done in SHMN or Bitcoin as seen on platforms such as GinCoin and ZCore.

## **2. STRONGPAY**

SHMN will be one of the coins that will take part of StrongPay Project which will involve apps for mobile phones and smartwatches where people will be able to fast send payments.

## **3. STRONGHANDS EXCHANGE (SHNDX)**

SHMN will play an important role as trading pair at exchange where a real establishment as base currency is expected and possibly valuation to guarantee as passive income.

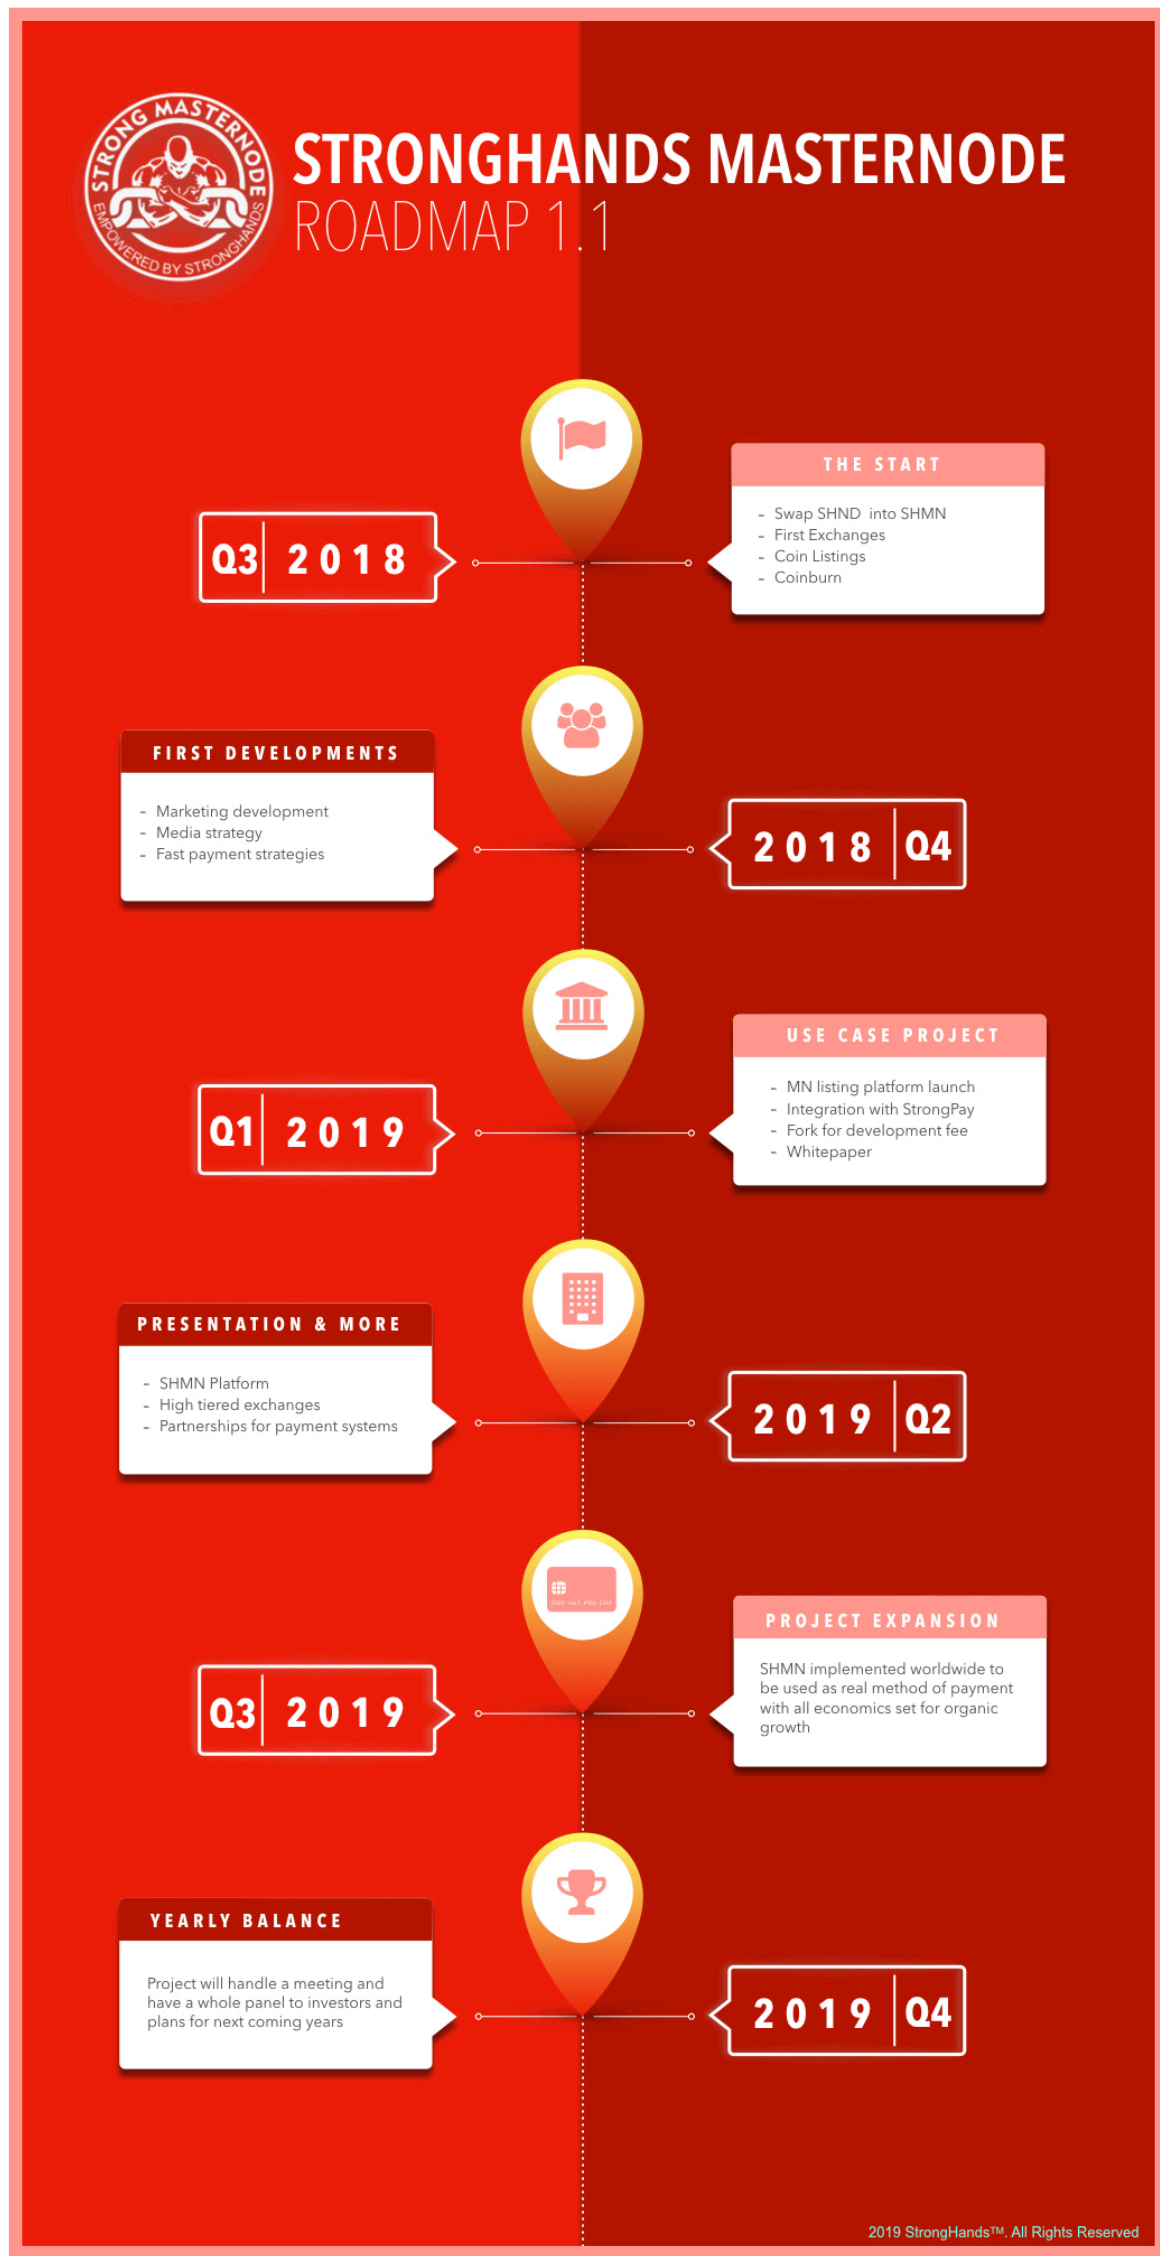

## **4. STRONGHANDS ATHLETES PLATFORM**

SHMN as a part of StrongHands Project also have the feature to be a cryptocurrency used to crowdfund the new StrongHands Athletes' Platform. In this environment currency will be payment method for donations to secure funds, athletes may give back rewards for special fans if they wish so. All depend on this new project rules.

## **5. STRONGHANDS ACADEMY**

The cryptocurrency will be in the future be used to pay for the online courses at the new StrongHands Academy website. It is the first step into the new education project.

# ROADMAP

# COMMUNITY FUND

After the 5,000,000 SHND:1 SHMN event on August 2018, 3.3 trillion original StrongHands were burned into SHMN coins. To make this process happen 4.2 million SHMN coins were premined, the unused were all burned in order to keep the reliability on project.

However, to be on listing sites and other services, fees are required to be paid and for this reason development team decided to change the code in order to generate 20,000 SHMN along the year as a development fund as development fees.

After reaching the amount desired, chain will be forked again to stop generating funds and this process can be revised time to time according to the Kaizen Protocol and project expansion. All events shall be communicated to community three months prior to the date.

Only three core members will have access to the funds to make the best decisions for the future of the currency. Those are the Project Managers and Lead Developer, they will have access to private keys in a multi signature wallets, so nobody from core team will make sided decisions.

Every new path will be decided through voting in a simple system. Suggestions from community will be welcome and deep discussed before submitted to vote.

Community Fund will be used for:

- New Exchange Listings;
- Trading competitions at exchanges;
- Bounty programs on social media;
- Reward staff and collaborators;
- Marketing
- Sponsor athletes, educational projects and major events;
- Website hosting and other costs.

## **THE STRONGHANDS TEAM**

In a great generation, StrongHands is inspired and supported by of over 12,000 community members who believe in financial freedom, friendship, love, compassion, and a better world without oppression against the poor and those in need. With StrongHands Masternode things wouldn't be different. Same community supporting and investing on both coins as a full project.

StrongHands is a multi-level, worldwide community whose purpose is to motivate and encourage individuals to pursue a healthy, well-balanced lifestyle combined with financial freedom for all individuals involved in it.

Special thanks to Jackson Briggs, Bumba, Mike The Great and the Japanese Community who have the courage, resilience, and willingness to fight for an affordable cryptocurrency for all.

Special honors to Michael Larry-Reed, aka Bitcoinbabys, a great man full of generosity who worked hard promoting the Classic StrongHands, while fighting against all the negativeness with much wisdom in an attempt to make this cryptocurrency a trustful asset for the future.
