

# **Masternodes.me Whitepaper v1.0**

*The earliest known use of the term “White Paper” was with the British Government and the **Churchill White Paper of 1922**. Back then, it was considered to be a less extensive version of the blue book, both terms having been derived from the colour of the document’s cover.*

*So the white it is.*

### **Purpose of Masternodes.me :**

The goal of Masternodes.me will be to provide a full service to clients who want to invest in masternodes.

A Masternode is defined as a governing hub in some cryptocurrency networks. It requires an initial collateral of tokens to operate most of the time on the Ethereum blockchain. Masternodes play a role in certain block chains, at the time of the validation of the transaction and securing the network.

Dash, at the origin of the masternodes concept.

Dash (formerly Darkoin) was born in 2012 but is only presented in 2014 by Evan Duffield, founder of the project. Originally the ambition of the developers was to offer a totally decentralized digital alternative to cash by taking three of its main attributes: its fungibility (ease of use), its speed and its anonymity. The Bitcoin protocol did not incorporate these suggestions for improvement, so Evan Duffield decided to implement them himself in a new network: DASH.

Dash is a digital "currency" that allows fast, low-cost transactions without relying on a central authority. It offers two optional modules for anonymous and instant transactions called PrivateSend and InstantSend. These features are implemented through a network of dedicated servers called "masternodes". This masternode network makes many remarkable functions that are not available on conventional blockchains.

Only few people know the principle of masternodes and how to invest in them, but the number doesn't stop increasing, +75% in those 12 months.. It's not always easy for everyone to know how to invest so we decided to provide an "all inclusive" service.

Second point is, when you want to invest in a masternode, a lot of people only read the ROI of the masternode without thinking, that if the coin drops down, he will lose a part of the investment.

What we will bring to the client is very simple but essential, first the attractivity and the solidity of the DeFi coin project, we will analyse it, then of course the ROI of the masternode and then we will try to minimise the risk by cutting the masternodes in slices and mixe them.

### **How to use Masternodes.Me ?**

We will do our best to make it easy and simple for the client.

First he chooses which investment he wants with the tool we provide, then he creates his account and sends the money. Our team will do the rest whether he sends FIAT or Crypto money.

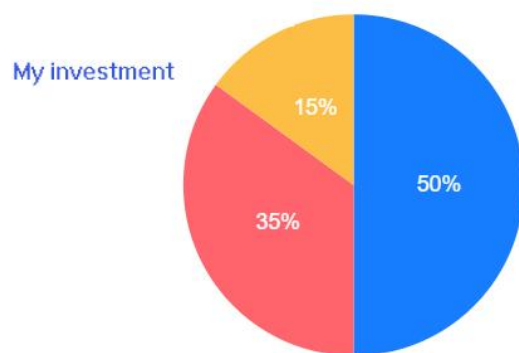

He will have the choice between credit card (by Stripe) and will pay the fees, bank transfer (free of charge) and crypto via Coinbase Business (with fees).

**The advantage of using Masternodes.Me :**

The customer has the choice, either he comes to take information to invest himself in a service like Crypos.io or IhostMn (we use their services) or takes full advantage of our service we provide.

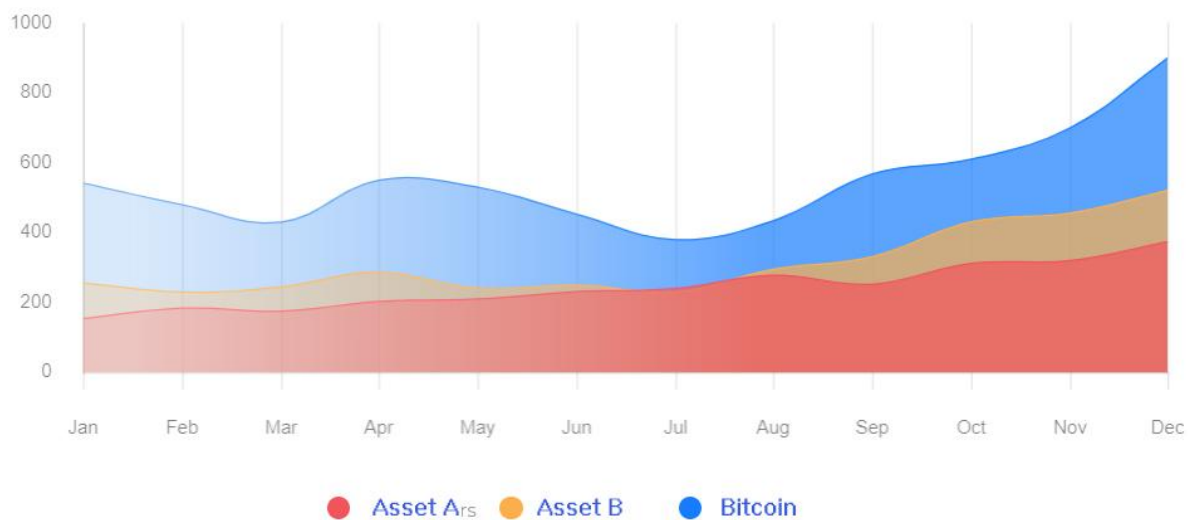

If the client decides to trust us, then he will have a dashboard's access to see how his money goes, he will have nothing to do, we take care of everything.

Clients can withdraw his money anytime he wants, must be treated within 12 hours.

Evolution of my investment

● Asset A ● Asset B ● available

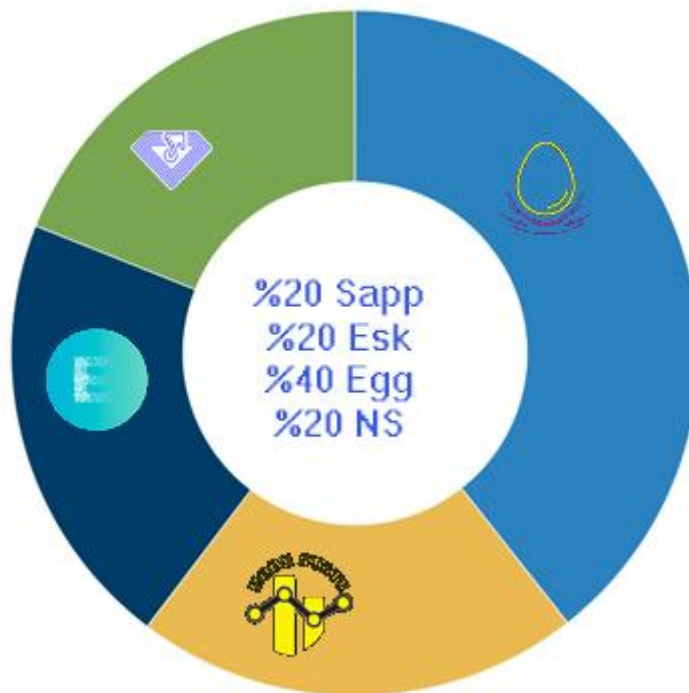

**Real MNROI© :**

With the tools we provide, the investor can easily make his choice in his investment, first the project analyse, then the ROI of the masternode and our joker is what we call the real MNROI©, which is a secret algorithm who takes in count Masternode ROI, project analyse, variation of the crypto coin and Masternodes rewards with the impact of collateral chagement.

Of course, the real MNROI© is will be variable and we will try to reduce the variability by building assets with masternodes slices.

Ex **Asset A** ROI 350% real MNROI© : 600%

Please note, however, that past performance is no indication of future performance.

**What business model for Masternodes.Me ?**

The money we will earn will come from ads on the website (we think 10% depends on the traffic) then the fees of the assets transaction, we think about 5% fees each time an investor buys or sells, and low fees for withdrawals.

**What marketing for Masternodes.Me ?**

We will announce on every crypto websites and adwords campagnes on Google.

**Presale :**

If you want to buy MNME in presale, here are the prices in BTC, first money from the presale will be collected for crex24 and Graviex listing :

Coins quantity	Bonus	Amount
100 MNME	-	0,0025 BTC
200 MNME	-	0,005 BTC
300 MNME	-	0,075 BTC
400 MNME	-	0,01 BTC
500 MNME	-	0,0125 BTC
1,000 MNME	5%	0,025 BTC
5,000 MNME	15%	0,125 BTC
10,000 MNME	20%	0,25 BTC

**Coin's Technical elements :**

Type: Proof-of-Stake  
 Name: Masternodes.me  
 Symbol: **MNME**  
 Algorithm: **Quark**

Max coin supply: 21 000 000 **MNME**  
 Premine: 1 000 000 **MNME**

Block time: 60 seconds  
 Maturity: 101 blocks

Masternode Reward: **90%** Staking Reward: **10%**

**Collateral structure:**

Start block	End Block	Collateral	Reward	Masternode (90%)	Staking (10%)
1	15,000	1,000	1	0.90	0.10
15,001	30,000	2,000	2	1.80	0.20
30,001	45,000	3,000	3	2.70	0.30
45,001	60,000	4,000	4	3.60	0.40
60,001	75,000	5,000	5	4.50	0.50
75,001	100,000	10,000	10	9	1
100,001	125,000	15,000	15	13.50	1.50
125,001	150,000	20,000	20	18	2

150,001	175,000	25,000	25	22.50	2.50
175,001	200,000	30,000	30	27	3
200,001	225,000	35,000	35	31.50	3.50
225,001	250,000	40,000	40	36	4
250,001	275,000	45,000	45	40.50	4.50
275,001	300,000	50,000	50	45	5
300,001	325,000	55,000	55	49.50	5.50
325,001	350,000	60,000	60	54	6
350,001	375,000	65,000	65	58.50	6.50
375,001	400,000	70,000	70	63	7
400,001	425,000	75,000	75	67.50	7.50
425,001	450,000	80,000	80	72	8
450,001	inf	85,000	85	76.50	8.50

**Roadmap :**

2021 - Q2: Whitepaper release, Blockchain-Start and Desktop wallet release

Releasing Masternodes.me website with referencing of masternodes projects with Real MNROI® Beta testing

Building the Discord community and bitcointalk

Public Presale Masternode service listing (IhostMN & Crypos)

2021 - Q3 : Listing to major exchange, maybe before if presale is over.

Masternodes.me website will be implemented with client account, deposit and withdrawal building the Assets

2021 - Q4 Masternodes.me website fully released, and building marketing campaign.

**Client risks awareness will be told as followed :**

**User Warranties :**

By using Masternodes.me, you are making the following warranties

**Investment risk :**

As written, investment is risky and the capital can be lost

**Full Knowledge.**

You warrant that (a) you have read Masternodes.me's Terms and Conditions, understand them, and unconditionally agree to be bound by them; (b) you have read Masternodes.me's disclaimer, understand it, and accept it; and (c) the warranties you make by using the site are truthful.

**Awareness of Risks.**

You warrant that you understand that cryptocurrency token and initial coin offering (ICO) projects are inherently highly risky and extremely speculative. They are unregulated, in an early stage of development, with experimental software and business models, no governmental protection of your investment, dramatic price volatility, the strong potential for inadequate documentation, and a high risk of fraud.

You should only invest in cryptocurrency token or ICO projects if you have substantial technical knowledge and understand the specifics of the offering. Careful due diligence should be undertaken on the projects, network, tokens, and team behind any token sale or ICO. You must understand that your and others' investments may not result in a usable or valuable token and you may lose the entire value of your investment.

**Volatility.**

The entity that issues a token or virtual coin may wish to store or convert cryptocurrency into one or more fiat and/or alternative cryptocurrencies. There could be serious problems making and managing such cryptocurrencies and funds, including difficulties related to the lack of ready convertibility between fiat currencies, cryptocurrencies, and tokens or to dealing with them via traditional market counterparties and intermediaries. If the value of cryptocurrencies fluctuates unfavorably during or after a token sale, the entity issuing the tokens may not be able to fund development or develop or maintain the technology platform allowing use of the tokens as it intended to do. In addition to the usual market forces, the risk of unfavorable fluctuation in the value of cryptocurrencies could be exacerbated by another DAO-like attack on the Ethereum network, by security incidents or market irregularities at one or more of the major cryptocurrency exchanges, or by currently unforeseeable events.

**No viable legal remedy.**

In the event of a dispute between you and the entity issuing tokens or any related or associated entity about any aspect of a cryptocurrency token or ICO project, it may be prohibitively difficult or costly for you to assert your legal rights. Even if you do bring a claim, prevailing on your claim may be difficult or impossible because of the difficulty of distinguishing between legally binding and enforceable contractual representations, warranties and terms and mere projections about the expected future of tokens that do not constitute legally binding promises and representations. Your ability to prevail on any such claim will be extremely difficult because of the presence in the terms and conditions applicable to token sales of numerous warnings about the many risks involved in purchasing or using tokens or virtual coins.
