

Whitepaper **FireAnts**

FireAnts

ANTS native Blockchain and BEP-20Token

FireAnts is a fair and open peer-to-peer blockchain system to support sovereignty for everyone by providing an automomous financial and data management system that is based on mathematics instead of trust.

2 Introduction - FireAnts are little helpers!

The invention of the Bitcoin protocol has opened the door to new forms of financial interactions. One such form is the adaption of blockchain technologies for the use as a social currency. FireAnts which is a form of money created by the FireAnts association to serve the economic and social interests of people. FireAnts shall keep people active by combining blockchain technologies with humanitarian and socio-economic challenges. This project strives to support sovereignty to individuals by providing an autonomous financial data management and government system that is based on mathematics instead of trust.

Vulnerabilities are, in most cases, amenable to technological mitigations that must be adaptable to both community values and changing conditions, emphasizing the need for careful design. The FireAnts association and its developers are taking care of the state of the art design of the FireAnts blockchain. It is about creating a sense of community and by that a strong affiliation between customers, consumers and users of FireAnts. FireAnts increase engagement with consumers and interaction with customers, and by that adding to the customer conversation around the FireAnts, it grants access to information and knowledge, which is being shared within the FireAnts community.

FireAnts is also a platform for developers to create applications for the preservation of endangered cultures. Languages, cultures, and traditions can be preserved on the FireAnts blockchain. With the help of FireAnts, legacies can be recorded for eternity. In addition, archaeological finds or specific items could be tagged, digitized and monetized.

With no repository or single administrator, and since all the code used for its own functionality is open source, FireAnts is considered a decentralized system. The FireAnts association donates its FireAnts coins and tokens to philanthropic projects that aim to increase fairness and justice in human society. Among other things, the FireAnts associations focus is on the sovereignty of minorities and oppressed cultures that are dependent on centralized and inflationary systems.

FireAnts started as ERC-20 token on the Ethereum blockchain and developed their own native FireAnts blockchain based on the Scrypt (Litecoin) algorithm. The ERC-20 token can be burnt and claimed as BEP-20 token on the Binance Smart Chain.

3 The FireAnts Association

The FireAnts association is about to be formed by the FireAnts development team in the beginning of 2022. The headquarter of the FireAnts association will be located in Bale, northwestern Switzerland. Next to the United States and Germany, the decision was made to locate the FireAnts association in Switzerland, because it offers one of the world's best statutory regulated environments for cryptocurrencies and digital assets. The focus of the FireAnts association is on sovereignty of people, philanthropic and humanitarian projects such as bank the unbanked and the offering of a decentralized finance, data management and voting system.

The FireAnts association spreads awareness of how to behave securely in a more and more digitized world. Philanthropy and cybersecurity are some of the most important keypoints. The FireAnts association serves as donation aggregator, whereby the ANTS coin and rANTS token will be donated to the various scientific projects of the FireAnts directors board of advisors, allowing them to generate funds for their projects, to bring them faster to completion and success. In comparison to other associations, the FireAnts association only charges little membership fee and everyone is able to join the FireAnts association by contribution of work. Ideally this is covered humanitarian-, social-, or sustainability work, cybersecurity projects or blockchain programming. The FireAnts association cares about marketing and merchandise, to bring FireAnts as a decentralized status symbol into public awareness. The FireAnts association has premined 52,500,000 ANTS coins, which are 25% of the FireAnts ANTS coin total supply. A fixed amount of ANTS coin and rANTS BEP-20 token will be regularly donated to the board of advisors.

A large amount of the premined ANTS coin is reserved for donations and for donation aggregation by staking, the staking rewards will be regularly donated to the directors board of advisors.

Developers and members of the FireAnts association will maintain the network until this becomes fully decentralized. In a subsequent process, the FireAnts blockchain will fully move to a proof of stake consensus that allows the owners of the ANTS coin to create masternodes which enable to earn ANTS coin as validator on the FireAnts network. The masternode concept allows the implementation of a data layer to the network, enabling the creation of smart contracts, voting systems and non-fungible tokens (NFT's). While the FireAnts blockchain is in its mining and distribution epoch, the FireAnts association is actively mining ANTS coin and adds these coins to the donation aggregator wallet, permanently increase the amount of ANTS coins available for donations.

4 The Directors Board of Advisors

The directors board of advisors are projects and persons of public interest that aim to improve social sovereignty and help to bring more fairness and equity to the future of humanity. Every scientific project is able to apply to the directors board of advisors, and will be supported by the FireAnts association. The first advisors of the FireAnts association are Dr. Andrea C McAleenan, Ph. D., Dr. Nicole Cochran, Ed. D and Dr. Peng Wen, Ph. D.

<https://fireants.online/directors.html>

4.1 Dr. Andrea C McAleenan, Ph. D.

Dr. McAleenan's career spans senior leadership positions in public and private higher education, K-12 and the not-for-profit sector. Her work encompasses academic and student affairs administration, graduate and undergraduate level teaching and advancement (fund and fund raising, major gift work, special events, marketing and communications, alumni relations).

Bridge building, networking and partnership development are signature threads throughout her career. Dr. McAleenan began her career in public school counseling serving at-risk student populations in Michigan and Hawaii. Dr. McAleenan moved to the University of Hawaii where she designed system-wide admissions and articulation strategies for eight campuses. Her public higher education work continued at California State University, Northridge where she designed a university wide orientation and retention model.

Transitioning to private higher education, she co-founded a Masters Degree program in College Student Development serving as professor and department chair, prior to becoming the Dean of Instruction at Azusa Pacific University where she was responsible for accreditation, faculty development, enrollment management, and the Offices of the Registrar, Multiethnic Students, Learning Skills Center, Center for Personal and Career Development and Orientation.

As part of a four-year Federal agency partnership, Dr. McAleenan moved to Communities in Schools based in Washington D.C. to establish integrated approaches for student retention in large urban school districts. Dr. McAleenan served as Director of Communications and Congressional

Liaison prior to establishing and directing the Western Region's Center for Partnership Development and Training in Los Angeles. McAleenan joined the administration at the University of California, Los Angeles (UCLA) serving as Assistant Dean for the Executive and part-time MBA programs at the Anderson Graduate School of Management.

Identifying partners and coordinating international field study projects enabled her to work with many multinational companies including, NOKIA, SONY, BHP (Australia), AVL (Austria), SGS-THOMSON (France), New Zealand Enterprises, and DISNEY EUROPE. Dr. McAleenan founded UCLA's Global Partners Forum and became Associate Dean for International Relations, collaborating with business and government entities in 26 countries.

Dr. McAleenan was asked to join the Peter F. Drucker Graduate School of Management at Claremont Graduate University as Executive Director and Chief Operating Officer and later was appointed Dean of Executive and Extended Learning. Following that she served as Vice President for Advancement and Chief Development Officer for InterVarsity (Madison, WI) where she designed comprehensive advancement, fund development, alumni and communication strategies for national and international constituencies. Dr. McAleenan returned to California as the Special Advisor to the President of Azusa Pacific University.

She focused on increasing the University's visibility and impact on national and international platforms including a creating a Global Think Tank for government, business and academia leaders from 45 countries at Lausanne's international gathering in Cape Town, South Africa.

Dr. McAleenan moved to the Central Valley of California where she was on the faculty of the School of Business at Fresno Pacific University teaching Global Management and Leadership in the MBA program. She also served as Director of External Relations and Partnership Development.

The FireAnts association is pleased to welcome Dr. Andrea C. McAleenan Ph D, and is very proud to regularly donate ANTS coin and token to support her projects!

4.2 Dr. Nicole Cochran, Ed. D.

Dr. Cochran is talented in connecting with team members where trust is built, significant moments are shared, diverse perspectives are respected, and where communication and collaboration are common. With over 25 years working in education, non-profit and complex organizations as a director, professor, trainer and coordinator, her expertise lies in the practices of bias reduction, racial equity, diversity, and inclusion through a trauma informed lens while creating safe spaces for understanding and inclusivity. Her facilitation style has been described as engaging, and honest with a dash of humor. This allows her to create connected groups through courageous, and at times, uncomfortable conversations. She has led workshops, professional development seminars, and community conversations to tear down walls and build bridges of understanding and connection. She is certified in Restorative Justice practices, and has a unique ability to collaborate with diverse, resistant, and combative groups. As a maximizer, Dr. Cochran is skillful at placing people in positions to leverage their strengths and abilities. Moreover, she has a talent for creating simple and reliable accountability markers through consistent evaluation and feedback.

What sets her apart from most leaders is the ability to serve others while meeting and effectively going beyond the requirements and expectations of the organization. Supervising programs provided Dr. Cochran with unique insight for working with people across intersecting lines for better collaboration, respect, and opportunities for change. Over her years of research and practice she discovered that innovative and thriving programs are developed in community. She has a proven success rate and can attest to the power of mentoring, community, stakeholder support and encouragement to spark the desire for individuals to flourish beyond difficult circumstances. Dr. Cochran has been an advocate for social justice and social change for many years. She volunteers in communities that struggle with safety and poverty. Her desire is to advocate for the marginalized and support them where they are, whether it is unemployment, homelessness, youth equity in education, or fighting for justice. Her passion is people and serving them.

The FireAnts association is pleased to welcome Dr. Nicole Cochran Ed. D., and is very proud to regularly donate ANTS coin and token to support her projects!

4.3 Dr. Peng Wen, Ph. D.

Raised in rural Taiwan in a non-Christian family, Dr. Peng Wen Ph. D., who retired in July 2019 as professor of business administration and economics, and director of the MBA program, came to the U.S. in 1985 to earn his MBA at the University of Oklahoma City and PhD of Economics at the University of Florida. When he just arrived the US, he joined a Bible study to help his English proficiency and learned more than he bargained for. "To practice English conversation, you have to ask questions, to ask questions you have to read ahead," he says.

Wen made his confession of faith four months later. An ad in the Chronicle of Higher Education brought Fresno Pacific to Dr. Wen's attention while he was finishing his Ph. D. at the University of Florida at Gainesville. He came in 1990, looking for a place to share his faith through teaching economics and finance. "When this job was offered to me I said, 'Perfect,'" he says. There have been offers since he was tempted by one from financial giant Goldman Sachs. "I prayed about it and realized that's not about mission, that's about the material," he says.

Mission drives Dr. Peng Wen Ph. D. "God calls me to start a church wherever I am," he says, including one in Gainesville and the Chinese Fellowship at Bethany Church, Fresno.

In 2019 Dr. Peng Wen Ph. D. started to go to China to train church leaders. He will continue at Bethany church Chinese Fellowship until he trains a successor, then plant more churches in mainland China and Taiwan. As he told Christian Leader magazine: "When I confessed my sins to Jesus, I said: 'I don't desire just to know you, I desire to make you known.'"

The FireAnts association is pleased to welcome Dr. Peng Wen Ph. D., and is very proud to regularly donate ANTS coin and token to support his projects!

5 FireAnts Investment Plans

By purchasing FireAnts coins and/or tokens, investors support philanthropic and humanitarian projects, such as the work of Dr. Andrea C. McAleenan, Ph D., Dr. Nicole Cochran, Ed. D. Investors promote equality and fairness among human society, furthermore, investors are able to observe how their investment is used within the FireAnts project observed and guided by the FireAnts association. Since blockchain technology allows full transparency of transactions, the investors are always able to check and observe the state of their investment. FireAnts aims to be a globally known as status symbol, respectively as an emblem that is well known for its support of philanthropic-, humanitarian-, sustainability projects. Everyone will love the FireAnts as commitment status to human rights, social justice and charity! Next to the support of philanthropic and humanitarian projects, investors will participate in the new and upcoming blockchain industry that offers the same potential as Bitcoin in its very early days. FireAnts ANTS coin and redFireAnts rANTS token will be introduced by an ICO in quater 4 of 2021. For the initial offering the price for the ANTS coin is \$0.25 per coin and for the rANTS BEP-20 token \$0.0000025 per BEP-20 token. See Addendum 1 of this whitepaper.

6 Overview FireAnts ecosystem

			
FireAnts Coin	wrappedFireAnts	redFireAnts	FireAnts
ANTS	wANTS	rANTS	ANTS
Blockchain	BEP-20	BEP-20	ERC-20
Max. supply: 210,000,000 ANTS coin	Available amount dependent on actual ANTS Coin supply	Total supply: 21,000,000,000,000 rANTS token	Total supply: 21,000,000,000,000 ANTS token
Can be wrapped to BSC	Can be unwrapped to FireAnts Chain	Can be claimed for ANTS token	Can be burnt to claim rANTS
https://explorer.fireants.online/ https://openchains.info/coin/fireants/blocks	https://bscscan.com/token/0xcd845749201e07c678563bc5ef7534c85550d496	https://www.bscscan.com/token/0x567BBEF0efDF53355C569b7AeddE4C4f7c008014	https://etherscan.io/token/0xa9fbb83a2689f4ff86339a4b96874d718673b627

The FireAnts ecosystem consists of the native FireAnts coin [ANTS], wrappedFireAnts BEP-20 token [wANTS] that reflect the FireAnts coin on the Binance Smart Chain, the redFireAnts BEP-20 token [rANTS] and the FireAnts ERC-20 token [ANTS]. The ratio between rANTS BEP-20 token to ANTS coin is 100,000 : 1, meaning that one ANTS coin is worth 100,000 rANTS BEP-20 tokens. Users are able to swap between ANTS coin and rANTS BEP-20 tokens. In addition, the ANTS coin can be 1 : 1 wrapped to wANTS BEP-20 to the Binance Smart Chain, allowing access to DeFi applications, such as yield farming, liquidity mining and many other applications provided by the Binance Smart Chain. The wrapping service for the ANTS coin is provided by the Team of Monetaryunit.

Due to high gas fees for transactions on the Ethereum blockchain, low volume transactions are not suitable for investors when using ERC20-token, here the Binance Smart Chain offers a cost saving solution to participate in the DeFi space. To allow the ANTS ERC-20 token to move to Binance Smart Chain users can claim rANTS BEP-20 token by burning ANTS ERC-20 token.

7 FireAnts Native Blockchain

Algorithm	Scrypt, 50% PoW & 50% PoS
Coin name	FireAnts
Coin abbreviation	ANTS
Public address letter	A - B
Block reward (PoW)	100
Last PoW block:	691200
Block reward (PoS)	100
Min. stake age	6 hours
Blocktime	3 min

One year after the creation of ANTS ERC-20 token on the Ethereum blockchain, the FireAnts Team has developed a own blockchain system using the ANTS coin as native currency. To enable interaction between ANTS coin and rANTS BEP-20 token on the Binance Smart Chain, the ANTS coin can be wrapped 1 : 1 to the Binance Smart Chain.

~ 210,000,000 ANTS coin will ever be created and this cannot be altered due to the code programmed into the blockchain.

25% of the total ANTS supply has been premined. These premined coins are used by the FireAnts association for donation aggregation and blockchain development.

16.5% of the total supply of ANTS coin can be mined using the Scrypt (Litecoin) algorithm, and the other 58.5% ANTS coin will be minted by staking in wallets and masternodes. The block time for the generation of each block is approx. 3 min.

In 2025, the proof of work phase will end at block 691200 and the FireAnts bolckchain will move completely to Proof of Stake consensus. Masternodes will be implemented when the change from the proof of work to proof of stake happens. This way it can be ensured that the power consumption of the FireAnts network can be kept at an environmental friendly level.

7.1 FireAnts premined ANTS coin distribution

30% of the premined ANTS coin supply is reserved for donations and 25% of the premined ANTS coin supply is reserved for investors.

25% of the premined ANTS coins are used as liquidity to generate staking rewards in the donation aggregator wallet, the staking rewards will be regularly donated to the directors board of advisors projects.

10% of the premined ANTS coins will be used to secure the FireAnts network using state of the art technologies.

5% of the premined ANTS coins is used for marketing, these ANTS coin will be distributed by tip-bots for airdrops, faucets and will be given away on charity events and 5% of the premined ANTS coins will be used for the FireAnts team development.

8 Blockreward cycles of FireAnts coin

Unlike bitcoin, the blockreward reduction cycles (known as halving) on the FireAnts blockchain happens every 24 month. This reduction follows its unique pattern and enables a steady state condition at a supply of ~210,000,000 ANTS coin. This ammount will never be exceeded!

Starting with a block reward of 100 ANTS coin per block, whereby the blocks are randomly with 50 / 50% probability are distributed between miners and stakers.

The first blockreward reduction will take place at block 345'600, then the supply of the blockreward will be to 40 ANTS coins.

The second blockreward reduction at block 691,200 will reduce the blockreward to 30 ANTS coin per block.

In this phase the FireAnts blockchain will undergo a transition to a new epoch, the blockchain will completely leave the proof ow work consensus and move to full proof of stake with masternodes consensus. The FireAnts blockchain then allows the creation of masternodes for ANTS coin holders, and a data layer is integrated that allows the creation of smart contracts and non fungible tokens (NFT's).

The 3rd reduction will generate 20 ANTS coin per block.

The 4th reduction will generate 10 ANTS coin per block.

The 5th reduction will generate 5 ANTS coin per block.

The 6th reduction will generate 2 ANTS coin per block.

The 7th reduction will generate 1 ANTS coin per block.

The 8th and last blockreward reduction will generate 0.1 ANTS coin per block. From this point on, the blockreward will remain permanently at 0.1 ANTS coin per block, this will be no longer reduced. Due to the transaction fees burnt by transactions, the supply of the FireAnts coin will reach an equilibrium of ~210,000,000 ANTS coin in the year 2057.

8.1 Release curve of FireAnts ANTS coin

9 Wrapped FireAnts BEP-20 token [wANTS]

The FireAnts coin can be wrapped 1 : 1 to BinanceSmartChain (BSC).

Token Name	Wrapped FireAnts
Token Symbol	wANTS
Total Supply	The supply of wANTS is bound to the actual existing amount of coins on the FireAnts blockchain.
Smart Contract	0xcd845749201e07c678563bc5ef7534c85550d496
Date of creation	Sep-14-2021 12:15:32 AM +UTC
Ratio wANTS to ANTS coin	1 : 1
wANTS token Explorer	https://bscscan.com/token/0xcd845749201e07c678563bc5ef7534c85550d496
Wrapping service by Monetaryunit	https://wrapping.services/get/ants/

10 redFireAnts BEP-20 token [rANTS]

Token Name	RedFireAnts
Token Symbol	rANTS
Total Supply	21,000,000,000,000
Smart Contract	0x567BBEF0efDF53355C569b7AeddE4C4f7c008014
Date of creation	Oct-04-2021 09:30:24 PM +UTC
Ratio rANTS to ANTS coin	100,000 : 1
rANTS token Explorer	https://www.bscscan.com/token/0x567BBEF0efDF53355C569b7AeddE4C4f7c008014

The rANTS BEP-20 token is used as gateway into decentralized finance of the Binance Smart Chain. The smartcontract can easily be integrated into applications running on BSC. The rANTS BEP-20 token can be safely stored in multicoin wallets accepting BEP-20 tokens, such as Metamask, Trustwallet or Coinomi.

To keep transaction costs at a minimum, the FireAnts team has moved the initial ERC-20 smartcontract to the Binance Smart Chain. Users can burn their ANTS ERC-20 token on the Ethereum blockchain, and are able to claim the same amount of redFireAnts [rANTS] token on Binance Smart Chain.

10.1 redFireAnts token distribution

30% of the rANTS token supply is reserved for donations to the directors board of advisors to support their projects as well as donations in case of devastating events like natural disasters or similar.

20% of the rANTS token supply is reserved for investors.

10% of the rANTS token supply is used to secure the FireAnts network.

10% of the rANTS token supply is used for marketing, the redFireAnts token will be distributed by tip-bots for airdrops, faucets and will be given away on charity events.

10% of the rANTS token supply is reserved for FireAnts blockchain development.

5% of the rANTS token supply will be used for website development and 5% for servers and hardware for the support of the FireAnts team.

11 FireAnts Roadmap

Year 2020

Q2 Creation of ANTS ERC20 Token:

Introduction of FireAnts through social media.

Q3 Social Media Program:

TIP-bot integration to tipcc and Tippy.

Discord / Telegram / Twitter / Facebook/ Instagram / Medium.

Q3 Exchanges:

Decentralized exchanges: Uniswap / Forkdelta and Bamboorelay.

Centralized exchange: unnamed.exchange

Q4 Airdrops:

Start of ERC20 token Airdrops on Discord.

Year 2021

Q1 FireAnts Blockchain:

FireAnts are happy to announce their own Proof of Work / Proof of Stake blockchain.

Q2 Marketing Strategy:

Strategical meeting for the extension of the FireAnts usecase.

Updates of website and whitepaper.

Q3 FireAnts Crypto Research USA:

FireAnts Crypto Research // Office in US-Lemoore, CA. 93245

339 West D Street Suite 1

Q3 Introducing FireAnts USA:

Introducing Fire ANTS to United State Native Americans Tribes in California Central Valley (6 Tribes).

Q4 Move the Binance Smart Chain

Wrapping service for the ANTS coin, and issuing redFireAnts rANTS BEP-20 token to move the ERC-20 token by a burning process to BSC.

Year 2022

Q1 FireAnts Association, NFTs & Smart Contract:

Registration of the FireAnts association with headquarter in Bale, Switzerland. FireAnts NFTs & Smart Contract for securing proprietary laws and self-gov. documents. Strategic analysis for Asia and Australia.

Q2 FireAnts Smart Contract:

FireAnts Smart Contract: Child Trust Fund 1 month – 18 Years

Q3 Smart Contract for Tribal Member:

Fire ANTS Smart Contract for Tribal Member PerCapita & Bonus. Southeast Asia FireAnts office expansion – Singapore.

Q4 Research & Development FireAnts:

FireAnts in business enterprises, stores, gas stations and restaurants. FireAnts coin & rANTS token in Casinos. Exchange of FireAnts with ATM and Scanners.

Year 2023

Q1 Testing POS / Mobile hardware:

Testing POS / Mobile hardware peripherals scanners QR codes process redFireAnts rANTS Tokens & ANTS Coin on business level.

Q2 Deploy hardware scanner:

Deployment of hardware scanner into tribal business entity to process method of payment redFireAnts rANTS tokens & ANTS coins.

Q3 Update new Web & App:

Update new Web & App. iOS & Android Wallet to increase security & stability for use in Tribal Governments.

Q4 Audit and security:

Audit and security check FireAnts Smart Contract using Certik Security 2021 Q3 partner.

Year 2024

Q1 Introducing to Native Americans Tribes:

Introducing FireAnts to United State Native Americans Tribes in Arizona, Washington State, Minnesota, and Mississippi. Introduction to FireAnts Private Blockchain & Smart Contracts

Q2 Integration and adoption with Native Tribes:

Continue to work on FireAnts integration and adoption with Native Tribes. Smart Contracts as well as Mobile Scanner and ATM.

Q3 FireAnts Trade Shows:

FireAnts are present at the following Trade Shows: Rez Trade Show / NIGA Show / TribalNET Conference / U.S and European Cryptocurrency shows.

Q4 Assistance of rural area tribes with technology:

Assist rural area tribes with technology consulting, high-speed internet, broadband, Mobility and ATM placement for the unbanked tribes.

Year 2025

Q1 Assist Tribe Deploy FireAnts Blockchain for Governement:

Assist Tribe Deploy FireAnts Blockchain for their government needs. Usage FireAnts ANTS coin and rANTS token as a bridge to swap with other cryptocurrencies.

Q2 Meeting with more Tribal Leaders:

Meetings with more Tribal Leaders across the United States to bring Fire ANTS adoption to Native American Tribes and into their Government and business enterprise.

Q3 Continue to support Native Tribe with technology:

Continue to support Native Tribe with technology challenges with highspeed internet broadband (wired /or Wireless PtP /PtMP).

Q4 Assist Tribe with Workforce Development:

Assist Tribes with Workforce Development in technology and education, work with tribal leaders to create sustainable ISP for Tribes by using the FireAnts blockchain.

12 Investment Plan 1

FireAnts - ANTS COIN

Investment [\$]	Rebates [%]	Coins [ANTS]
1,000	2.0	4,080
2,500	2.5	10,250
5,000	3.0	20,600
7,500	3.5	31,050
10,000	4.0	41,600
25,000	4.5	104,500
50,000	5.0	210,000
75,000	5.5	316,500
100,000	6.0	424,000
250,000	6.5	1,065,000
500,000	7.0	2,140,000
750,000	7.5	3,225,000
1,000,000	8.0	4,320,000

13 Investment Plan 2

FireAnts – TOKEN

Investment [\$]	Rebates [%]	Token [ANTS]
1,000	2.0	408,000,000
2,500	2.5	1,025,000,000
5,000	3.0	2,060,000,000
7,500	3.5	3,105,000,000
10,000	4.0	4,160,000,000
25,000	4.5	10,450,000,000
50,000	5.0	21,000,000,000
75,000	5.5	31,650,000,000
100,000	6.0	42,400,000,000
250,000	6.5	106,500,000,000
500,000	7.0	214,000,000,000
