

CATCOIN
CATPAPER

Welcome to Catcoin!

Catcoin is a community-driven token based on a meme with a big dream and was created by Miaoshi Nekomoto for the cat community.

In addition, Catcoin develops applications to a) provide the community with various tools and b) simplify the crypto world for new investors.

Catcoin is more than a token, it's a revolution!

Contents

- 01 • Token

- 05 • Team

• Catcoin • CATS

- 1 Trillion total supply
- 0,1% Burnt
- 2% Reflection
- Perma burn with each transaction
- 1% Development/Charity/Giveaway Tokens
- Unmodified Contract
- Ownership renounced
- LP Tokens burned

Spaceflight!

**The first token that will take people into space and make them astronauts!
By the end of 2022, we want to sponsor a ticket for a space flight and give it away to the community!**

We'll make you an astronaut in a Catcoin suit!

Our development is mainly focused on two major projects:

- **Crypto Combat**

A multiplayer game in which you can choose your favorite cryptocurrency and fight against other players!

- **Catnip**

A communication tool developed for various crypto applications, a mixture of decentralized ecosystem and anonymous community is made possible!

Check out our [Medium page](#) for more development updates.
