

# Introduction to Vita Inu Coin

Vita Inu (VINU) is the governance token of the VINU Ecosystem and is native to the Vite DAG chain. Created in 2021 by Element, VINU is the world's first fast, feeless (and cheeky) dog-themed coin with high TPS and smart contracts.

VINU's philosophy is to have fun, make new friends, and learn all about the greatest technological revolution of our lifetimes - cryptocurrency - within an engaging, viral ecosystem. In conjunction with the Vite network, Vita Inu seeks to play its part in building large DAG ecosystems where various cryptocurrencies may be moved around freely, securely, and efficiently.

The Vinuverse is under development, and will comprise of a full VR World, the VinuSwap Dapp, NFTs, Staking, Rewards, Events, Merch, and much more.

Conceptually, we have decided to build this project on the scalability of the community and the principles of transparency and accountability. We are fully committed to working for the long-term success and sustainability of Vita Inu. We understand fully that most cryptos are all bark and no bite, but we have both - offering perks that disrupt the new meme economy - such as zero fees, light-speed transactions, smart contracts, and high scalability. Through VINU, both new and seasoned cryptocurrency advocates may learn about various cryptocurrencies and how they may be bridged and connected in a fun way.

# Vite Network

Vite uses a Directed Acyclic Graph (DAG) ledger structure, and is a low-latency and highly scalable network. It is also the first public chain to implement smart contracts on the basis of a DAG ledger. Transactions on the Vite network are fast and feeless. The broader aim of the Vite network is to bridge different blockchains in a decentralised way.

One distinctive feature of the Vite network is its “snapshot” mechanism. This mechanism’s main function is to maintain consensus on Vite’s ledger. Snapshot blocks are created by “nodes”, which are called Snapshot Block Producers (SBPs). Vite holders can “vote” for SBPs, and the top 100 SBPs with the most votes will be allowed to produce blocks. As a reward for creating blocks, SBPs are rewarded (in terms of Vite) based on the number of blocks that they produce.

Typically, SBPs distribute a significant portion of their daily SBP rewards to their votes, as a way of rewarding them. Vite holders who are interested in supporting the VINU project may vote for the ViNo SBP. This will allow them to receive daily Vite rewards and additional VINU tokens. Receiving additional VINU tokens means that these Vite holders will end up receiving more rewards, compared to simply voting for an SBP that does not distribute additional tokens.

# Tokenomics

1,000,000,000,000,000

The total supply of VINU is 1 quadrillion (1,000,000,000,000,000). No more than this amount will ever exist. This means that there will be no worries about inflation pertaining to VINU.

# Distribution: Public

25%

In line with the core philosophy of VINU - to have fun, make new friends, and learn about cryptocurrency - a significant portion of the total supply (25%) will be freely distributed to the public.

**25% of the total supply will be distributed freely to the public.**

40% of public distribution funds were sold during a pre-sale, at a discounted price (\$0.000000001 / VINU). The pre-sale took place from 9 to 15 November 2021.

10% of the public distribution funds will be distributed through airdrops. These will be in the form of contests and games on VINU's social media platforms - Discord (<https://discord.com/invite/m7JxNcSt7e>), Telegram (<https://www.t.me/Vitalnu>), and Twitter (<https://twitter.com/VitalnuCoin>). These funds are intended as rewards for those who participate actively in VINU community activities.

10% of the public distribution funds will be allocated as ViNo SBP voting rewards. Vite holders who vote for the ViNo SBP are eligible to partake in this portion of funds, in addition to their daily Vite voting rewards.

40% of the public distribution funds will be reserved as staking rewards. The details of the staking mechanism will be released shortly.

# Distribution: Team

25%

**25% of the total supply will be reserved as payment for the contribution of the project team members.**

10% of the team distribution funds will be disbursed to core team members on Day 1 of the project listing.

65% of the team distribution funds are allocated as monthly payments to team members, for their contributions to the VINU project.

A final 25% of the team distribution funds are reserved as "bonus" for core team members at specific milestones.

2% at the 6th month mark  
5% at the 12th month mark  
8% at the 18th month mark  
10% at the 24th month mark

# Distribution: DAO

50%

**The largest portion of the total supply of VINU (50%) is reserved for the VINU Decentralised Autonomous Organisation (DAO).**

20% of the total supply reserved for the DAO is scheduled for monthly burns. This helps to maintain a stable value of VINU on the market.

15% of the DAO reserves will be used for marketing purposes. This includes paying for advertisements and other forms of publicity collaterals.

15% of the DAO reserves will be used for the growth and development of various aspects of the VINU project.

A final 50% of the DAO reserves will be spent in accordance with the deliberations and votes of registered DAO members. Details on how to register for the DAO will be made available soon.

# Commitment to Our Community and Investors

At VINU, we are committed to creating and maintaining healthy relationships with our community members and investors. The following are our core commitments:

## **RESPECTING DIVERSITY**

VINU aims to reach out to all communities in the world, regardless of their geographical location or identities. We currently have over 20 different country Telegram groups to ensure that we are inclusive to all.

## **TIMELY AND OPEN COMMUNICATION**

Above all, VINU is committed to providing timely and informative updates on the status of the project - from major developments to weekly community events and giveaways. No one will be left in the dark about what is going on with the project. The VINU team will also be receptive to the feedback of our community and investors, at any stage of the project.

## **FAIR RECOGNITION AND REWARD**

Some crypto projects rely on a sense of 'community spirit' to get its members to do volunteer work for free (e.g. by encouraging its members to create or organise events that help to publicise the project). At VINU, we are committed to fairly recognising and rewarding members who contribute to our projects in various ways. The following are some examples:

1. Members who create events, or contribute to the project in other ways, will be fairly compensated for their time.
2. Artists who create commissioned work for VINU will be paid for their work.
3. NFT creators will also receive 50% of profits for any and all their work listed on our OpenSea marketplace, in addition to their initial commission.

## **INTERNAL DOXXING**

Team members who are responsible for liaising with centralised exchanges and other legal entities are doxxed to those entities, and to each other. This ensures internal accountability, especially when large amounts of funds are involved.

## **LEGAL ASSESSMENT**

VINU has already received a legal opinion on its status as an organisation. We will subject ourselves for legal evaluations and audits, if necessary. Such legal opinions are critical for bringing VINU to greater heights, such as listing on major centralised exchanges.

## MONTHLY BURN

20% of the total supply reserved for the DAO is scheduled for monthly burns. This helps to maintain a stable value of VINU on the market.
