# DOLLAR \$ BACK

## WELCOME

You want to regain your investment lost to scams, and make a profit at the same time? Then support our project and become a part of our community, so that holding pays off for everyone again!

Unfortunately, by now people fall for scams and lose their money every day. Our goal is to create an active community which increases automatically by recruiting new members on common social media platforms. The community is our most important pillar as we can push the project only together. Every single member of the community can support the project with their commitment and thereby fill the pot for our giveaway.

We also plan listings on exchanges. Moreover, every team member will be available as a contact person on all social media platforms.

# DOLLAR \$ BACK

## **DOLLARBACK FOR BETRAYED PEOPLE**

Everyone who lost their money to a scammer can regain their investment through our giveaway. To qualify for our giveaway, you have to buy and stake our token first. Then you have to verify the amount of your lost investment.

Verification has to be provided via the giveaway form on our website as well as by sending the scam token onto a wallet which is set up specifically for your scam.

You cannot transfer your scam token? In this case, we check the authenticity of your information and then we admit you to the giveaway.

Only someone who really lost money to a scam gets the chance to win it back!

# DOLLAR \$ BACK

## DOLLARBACK FOR HOLDER

To permanently create a high volume and generate enough income for the giveaway, a tier system with staking will be set up. We expect a long-running, steadily growing rate as there is a huge number of people who fell victim to a scam.

By purchasing our token, victims help other victims.

Rewards are regularly distributed among holders, whereby you can increase the amount of tokens in your wallet and make a profit. This feature is turned off for staked tokens. It is meant to be a reward for our supporters.

Our website's setup will be strongly influenced by the setup of a launchpad (buy – stack – participate – win). Instead of winning whitelist slots, you can win the refunds of your investments with us.

## DOLLARBACK TOKEN BUY

For our dollarback project we created the token \$BACK.

To finance our project, we divided fees for buying and selling as follows

Our token has already been created. We will give up the rights after presale, so that no changes will be possible anymore!  
We will verify this with an audit after presale.

## Homepage

At the start of our project, we will create a Landing Page on which you can find all the Information for our upcoming project. We have already started working on the final website. It will go online after we finalized it and extensively tested its functionality.

As of this date, it will be possible to register on our Website and to enroll for the giveaway by using the giveaway form. The form will ask for all necessary Information. Every registration is checked for authenticity and will only be approved if all the data is correct.

In addition to the registration via the giveaway form, a certain amount of \$Back has to be staked – as it is common on most launchpads. Therefore, we will set up a tiersystem, which includes three Stages.

You will only be approved for entering the giveaway, if ...

- ☐ you have registered on our website with your email address.
- ☐ you can verify the scam using the giveaway form.
- ☐ you have sent your scam tokens to our scam wallet (transferable tokens).
- ☐ you have at least tier-1 status.

For the release of the ready giveaway all necessary information will be published on our Website as well as the common social media platforms.

## TEAM

We are a small European Team which is dedicated to help scam victims. We want to give people the opportunity to regain their lost Investment, motivate them to help us with that and thereby make the cryptospace cleaner and safer.

Everyone of us has years of experience in trading forex and cryptocurrencies. This experience will be incorporated into our project's programming.

Precise Information on the team can be found on the final homepage as we are currently still recruiting members for the support of the language chat system.

Every team member will complete the KYC process. Any further members will also have to do so.

## MISCELLANEOUS

After finalizing the giveaway, we will set up a database of known scams. Then we are going to concentrate on the setup of tools and programs that automatically inspect your tokens for scams and warn you if necessary.

We aim at entering into partnerships with similar projects to build a large scale, wide spread anti scam network.
