# What is Blockchain?

A blockchain is a type of distributed ledger or decentralized database that keeps continuously updated records of digital transactions (who owns what). The Bitcoin blockchain is designed as a write once read only database where records can only ever be added, not edited or deleted.

Rather than having a central administrator like a traditional database, (think banks, governments), a blockchain has a network of replicated databases, synchronized via the internet and visible to anyone within the network.

# Leader Work

Guru is best known as a Spiritual Leader and advisor

After many years of civil war large numbers of dogs & foxes have become homeless. Our aim to help, with your support, by first providing food.

*"Dogs and Foxes are intelligent animals, if we make them happy, God make us happy."*

# By helping and feeding Animals

We are currently experiencing a new World due to Corona virus, it's effects and its origins.

What may we learn from this?

Many people don't believe animals have rights. If, however, you accept that they do then the raising and killing of animals for food is morally wrong.

Dogs depend on us for their everyday needs. By helping and feeding a homeless dogs you will be blessed by God. By giving love to animals we all receive the love of God.
