

MONSTER LEGENDS

**Discover the universe of Monster
Legends and the story of its inhabitants**

Whitepaper V1.0

ABOUT

Monster Legends is a hyper-deflationary token as its circulating supply is gradually being whittled away. It will invest in multiple asset classes available on the market which lets the project mitigate risks while taking advantage of the possible non-correlated growth of the trending assets.

The hyper-deflationary mechanism of the token has a unique structure. Essentially, all of the profits made on treasury investments are then used to buy back and burn \$MONSTER tokens. Moreover, apart from the main deflationary mechanism, \$MONSTER has implemented automatic taxes on transactions. There is a 2% tax burn. Thus, the merger of these mechanisms guarantees a continuously rising price floor due to the decrease in the circulating supply.

MISSION

Monster Legends aims to build a strong family ready to be at the top of the meme coin movement. \$MONSTER holders will enjoy the burns, utilities, and memes as the newest meme coin on BSC and will get a ticket to wealth creation. Investors missing \$SHIB in the early days can join the \$MONSTER army.

MONSTER LEGENDS – A GOOD INVESTMENT

The Monster Legends is a good investment for those people who like to discover potential gems and enter crypto projects at an early stage. \$MONSTER is in its infancy despite the utility it already has offered to its investors. The value of \$MONSTER is expected to grow in the future.

VISION

Our vision is to develop complex combat animations for several characters. The deep expertise of our animators will allow us to bring them to life in accordance with their character and skills.

TOKEN DISTRIBUTION

MONSTER REWARD SYSTEM

Core game developers and significant community contributors are important participants who enrich the entire platform. Whenever they make an achievement, they will receive a Monster reward.

Game developers can earn income by publishing high-quality game content to the Monster platform. Their income includes mainstream digital currencies such as BTC, ETH & USDT and they will also get a portion of Monster rewards. At the same time, game developers can get more exposure by staking \$MONSTER. They can conduct rewards/ airdrop activities for Monster holders to get more user attention.

NFT + IN-GAMES UTILITY

With today's and the future technology, MONSTER project will introduce NFT integration to gameplay as a utility. Imagine a game world that can be modified and changed by its players as they see fit for their game strategy to come out as a winner. \$MONSTER will provide just that by using the NFT technology giving a player that owns a unique, rare NFT as an incentive for all kinds of game rules and settings during the game. Seeking these rare NFTs will become part of the whole game strategy. It provides a technology to use NFTs as utilities on gaming platforms.
