3. Magic Inu

Arbitrum Chain (ARB) was developed as a means of utilizing solidity-based smart contracts with much greater speed and efficiency than other, competing chains. With decentralized exchanges on ARB offering lightning-fast swaps and extremely low fees, ARB has started to become one of the most widely used blockchains for Decentralized Finance (Defi). ARB uses a token protocol developed by the BinanceTeam called BEP-20. Known for 2 second block speeds much faster than doge with 1 minute block speeds. These 2 articles compare block speed:

Doge 1 Minute

ERC-20/ARB 2 seconds

Advantages of the Arbitrum chain are:

It's a proprietary blockchain, which will provide security and safety to all users and developers.

Its native dual chain interoperability will allow cross-chain communication and scaling of high-performance dApps that require a fast and smooth user experience. It's EVM-compatible and will support all of the existing Ethereum toolings along with faster and cheaper transactions.

Its on-chain governance with Proof of Staked Authority consensus, built on validators who validate the transactions, will provide decentralization and enable significant community involvement.

4. Ecosystem

Community-Powered

Magic Inu is decentralized and owned by its fun, vibrant community. We welcome and embrace diverse perspectives to build Magic Inu into the best community in crypto. With a do-good mission of helping save dogs in need.

Instant Rewards

For every transaction in the Magic Inu network a 2% fee is distributed to existing holders. That means you earn more Magic just by holding it in your wallet. Watch your Magic grow every transaction!

Locked LP

Initial Liquidity tokens are locked. Additionally, 1% of all transaction fees are added to liquidity.

5. Magic Inu Protocol

Magic Inu uses 3 simple functions: 2% Sharing Magic + 1% LP + 2% Marketing . In each transaction, the transaction charges 5% fee, which is divided into two ways.

2%

2% fee = redistributed MAGIC to all existing holders with more than one trillion MAINU.

1%

1% fee is split 50/50 half of which is sold by the contract into ETH, while the other half of the Magic Inu tokens are paired automatically with the previously mentioned ETH and added as a liquidity pair on SushiSwap.

2%

2% of the tax is used for marketing purposes, and is automatically sold into ETH to the marketing wallet for the development of the project
