

CompuMar

Original Economic Revival

INTRODUCTION

CompuMar Trc18 Token (MAR) is a cryptocurrency that was issued on 25th April 2020 with a total supply of 100 billion tokens. The token has a precision of 3 and is built on the principles of fairness and absolute distribution. MAR can be obtained through the community and exchanges that list it. This white paper outlines the vision, purpose, and roadmap for MAR.

CompuMar (MAR) is a TRC20 token that was issued on April 2nd, 2021, with a total supply of 50 billion tokens. The token has a precision of 3 and is designed to be the native token of the CompuMar ecosystem. This white paper outlines the vision, purpose, and roadmap for CompuMar (MAR).

VISION

Our vision for MAR is to create a decentralized, secure, and transparent platform that empowers individuals and businesses to carry out seamless transactions. Our ultimate goal is to establish a global financial system that's accessible to everyone, regardless of their social status, financial capacity, or location.

PURPOSE

MAR is designed to serve as a utility token that functions as a medium of exchange, a store of value, and a unit of account. It can be used to pay for goods and services, transfer funds, or invest in other cryptocurrencies. Backed by a strong community of developers, investors, and users, we're committed to ensuring MAR's growth and success.

CompuMar (MAR) strives to offer innovative and effective solutions within the maritime industry. By leveraging blockchain technology, CompuMar seeks to enhance transparency and efficiency in maritime operations, thereby reducing costs and waiting times associated with port and cargo operations.

Blockchain technology enables real-time tracking of transactions and product movement along the maritime supply chain. Additionally, through the use of smart contracts and cryptocurrency payments, we simplify and expedite the payment and documentation process, resulting in significant time and cost savings.

CompuMar is also exploring new opportunities in the maritime industry, such as digitizing vessel registration and implementing monitoring and security systems. These solutions have the potential to improve operational efficiency and safety at sea while simultaneously reducing the risk of fraud and human errors.

ROADMAP

Get ready to join us on an epic journey towards revolutionizing the financial world with Compumar Token (MAR). Our goal is to create a global financial system that is accessible to everyone, regardless of their location, social status, or financial capacity.

THE ROADMAP FOR MAR IS DIVIDED INTO THREE PHASES

PHASE 1: LAUNCH AND ADOPTION (2020-2024)

The focus of this phase is to launch MAR and create awareness about its benefits and features. We will partner with exchanges to list MAR and engage with the community to promote its adoption. We will also establish partnerships with businesses that accept MAR as a form of payment.

PHASE 2: DEVELOPMENT AND EXPANSION (2025-2026)

In this phase, we will focus on the development of the MAR ecosystem. We will work with developers to create tools and applications that make it easier to use MAR. We will also expand our partnerships with businesses and explore new markets for MAR.

PHASE 3: SUSTAINABILITY AND GROWTH (2027 AND BEYOND)

The focus of this phase is to ensure the sustainability and growth of MAR. We will continue to innovate and improve the MAR ecosystem, expand our partnerships, and explore new opportunities for growth. We will also work towards achieving our long-term vision of creating a global financial system that is fair, transparent, and accessible to all.

CONCLUSION

Compumar Token (MAR) is a cryptocurrency that is built on the principles of fairness and absolute distribution. It is designed to be a utility token that serves as a medium of exchange, a store of value, and a unit of account. Our roadmap outlines our vision, purpose, and plan for the future. We are committed to creating a global financial system that is accessible to everyone, and we believe that MAR will play a crucial role in achieving this goal. Additionally, MAR is an experiment in blockchain technology that aims to support pandemic relief efforts and help revive the economy.

Distribution The MAR

Compullar is a highly innovative token that is distributed in a completely decentralized manner through a smart contract governed by the principles of the Bitcoin network and the Tron blockchain platform. This token was created on the Tron blockchain platform due to its benefits of speed, efficiency, lower cost, and greater scalability compared to other platforms.

Unlike many other tokens in the market, Compullar has not been subject to a pre-sale or sale outside of exchanges, and can only be acquired through the community or exchanges. This fair and equitable distribution ensures that all token holders have the same opportunities and rights in the Compullar ecosystem.

Furthermore, what's most astonishing about Compullar is its differential functionality, known as "Diff". This unique and distinctive functionality offers token holders a wide range of benefits and advantages that sets them apart from other tokens in the market.
