

OWXI TOKEN WHITEPAPER

VERSION 1.0

INTRODUCTION

Owxi Tokenplatform is designed to provide the future. and a better place to market your NFT creations like games, arts, virtual reality products, virtual creations, 3D movies, decentralized distributions of copyrights and much more yet to come in virtual world.

Owxi Token will act as mediator as well as creation platform alongside with marketplace for products described Creators will create as well as sell their virtual creations here. .

WHAT IS DEFI

Decentralized finance (DeFi) is an emerging financial technology based on secure distributed ledgers similar to those used by cryptocurrencies. The system removes the control banks and institutions have on money, financial products, and financial services

Some of the key attractions of DeFi for many consumers are:

- It eliminates the fees that banks and other financial companies charge for using their services.
- You hold your money in a secure digital wallet instead of keeping it in a bank.
- Anyone with an internet connection can use it without needing approval.
- You can transfer funds in seconds and minutes

WHAT IS METAVERSE?

The metaverse is a digital reality that combines aspects of social media, online gaming, augmented reality (AR), virtual reality (VR), and cryptocurrencies to allow users to interact virtually. Augmented reality overlays visual elements, sound, and other sensory input onto real-world settings to enhance the user experience. In contrast, virtual reality is entirely virtual and enhances fictional realities.

KEY TAKEAWAYS

- The metaverse is a shared virtual environment that people access via the Internet.
- Cryptocurrency is an aspect of the metaverse.
- Technologies like virtual reality (VR) and augmented reality (AR) are combined in the metaverse to create a sense of "virtual presence."
- Meta (formerly Facebook) CEO Mark Zuckerberg believes augmented reality glasses will eventually be as widespread as smartphones.

Owxi Token Gaming is an online gaming platform launched by the Owxi Token global network team. Crypto games are video games that run on a cryptocurrency network and include a completely or partially distributed ledger architecture, providing players with verifiable ownership over the virtual products contained in the games. Online gaming, in particular, has become a breeding ground for exciting innovation in this space. Developers are inventing new methods to leverage crypto to purchase and trade in-game products, cosmetics, unlock characters, and much more. The convergence of the virtual and the real – our metaverse – has never looked so good.

Current Marketing and access platforms for VR vs Owxi Token

THE OWXI TOKEN

There are much than more developments are happening in virtual world everyday. But what about the platforms needed to showcase these productions to the world and utilize their capabilities and use cases?

So we are here with project Owxi Token to give these innovations a showcase to reach the real world and connect them to users.

We have implemented and now working day and night to bring a real use virtual reality platform alongside trade and marketing of VR projects and products.

THE OWXI TOKEN

We have developed a prototype to insert virtual reality into blockchain.

To bring this platform into real world we are using Binancesmart chain network alongside with Moralismultichain support & metaverse SDK to make transactions speedy, frictionless and cheap.

Owxi Token(Owxi Token) will be served as native token of Owxi Tokenplatform to maintain, fund and rewarding & all transactions related to Owxi Tokenplatform.
