

CYBER TRASH ANIMAL (CTA)

White Paper ver 1.0

Foreword

Firstly, we have established the core value of CyberTrashAnimal (CTA). This is a brand that embodies the fighting spirit of the underdog, turning failure into motivation. In this digital wasteland, we embrace failure, collect the stories of all participants, and converge them into a river that runs through this land. We aim to create a big family that can freely express, share failures, and transform them into driving forces.

Cyber Trash Animals never give up, they are always in the fight.

We look forward to meeting you

Let us create our own story in this world full of challenges and opportunities. Let us find the value in failure and turn it into our motivation.

No matter where you are, no matter who you are, CyberTrashAnimal (CTA) welcomes you. Here, you will have the opportunity to fight alongside people from all over the world. We will create our own value in this new digital world.

We will challenge traditional notions and create a paradise where people can freely express themselves, share failures, and grow from them. We sincerely invite you to join this journey and create a new future with all partners.

Here, everyone is important. Whether you are an investor, a participant, or just an observer, we respect your views and opinions. The community will listen to everyone's voice and, within possible limits, try to meet everyone's needs.

Failure is not the end, but a new beginning.

The last point to emphasize is that the mission of CyberTrashAnimal (CTA) is not just to create a popular brand, but more importantly, we want to gather a force through this brand.

Everyone may face failure, but as long as we have the courage to face it, to learn, to grow, we can eventually stand up from failure and continue to move forward.

In this era, we always face various challenges and difficulties. The spirit of CyberTrashAnimal (CTA) is that no matter how many setbacks we encounter, we will keep going because we know that only by persevering can we create real value.

Therefore, no matter who you are, no matter where you come from, as long as you have the courage to face failure and the courage to pursue your dreams, you are our partner, we are your friends. We will move forward and grow together with you in this world full of challenges and possibilities.

We understand that for a new project, you may have many questions and concerns. We promise that we will share the growth and challenges of CyberTrashAnimal (CTA) with community members in the most transparent way. We believe that transparent and open communication is the key to building trust.

The ecosystem of CyberTrashAnimal (CTA) is global, and we look forward to friends from all over the world joining us. Our goal is to become a global brand and convey our philosophy to every corner. We hope that people of different cultures and backgrounds can find their place here and find partners who are also brave to face failure and pursue dreams.

Development

We will gradually expand the scope of CTA's business, which may include online games, board games, peripheral products, physical activities, clothing, figures, and so forth. CTA will become one of the solid partners for participants, and also a new starting point for them to confront failures.

CyberTrashAnimal (CTA) will plan each stage of narrative themes in the concept of chapters, allowing participants to jointly decide the theme and content of the next chapter. This not only enhances the sense of community involvement, but also allows CTA to continuously self-update and evolve. We will encounter a variety of partners here, collect a variety of stories, and over time, CyberTrashAnimal (CTA) will integrate more and more participants, thereby becoming a decentralized brand. It will truly become the child of all participants and the fruit of all participants.

We will build CyberTrashAnimal (CTA) into a trend brand, and according to the narrative theme of the first chapter - "WEB3 elements (including blockchain, metaverse, AI, etc.) cutting-edge technology", we will combine it with trendy culture, allowing everyone to have the opportunity to participate in this new trend.

Moreover, we will issue CyberTrashAnimal (CTA) ERC20 tokens, which will serve as the payment method for all sales products. Here, we want to emphasize again, this is not issuing NFT, but an ERC20 protocol token. ERC20 tokens have better liquidity and convenience. For example, whether CyberTrashAnimal (CTA) issues NFTs or opens pre-orders for physical products, it will be settled in CTA tokens. We will focus on creating a completely decentralized product. The value of such products comes from their value in the hearts of all participants and receivers, rather than the price tag in the display window.

We will also propose a certain proportion of CTA as a community welfare fund according to the overall operation status, and vote on how to use this fund for the possibilities integrated in the community.

In the future, CyberTrashAnimal (CTA) will continue to launch new products and events, and is committed to expanding our community. Only through continuous innovation and change can we stay ahead in this rapidly changing world. We will continue to improve products and services to meet the needs of the community. Only through continuous efforts and innovation can the project stand out in the competitive market.

ROMAP

【 R1 】

- 1-1. Completion of Website, Facebook, Instagram, Twitter establishment.
- 1-2. Completion of deploying CTA to the ETH chain, and liquidity deployment on Uniswap.
- 1-3. Completion of liquidity deployment on PancakeSwap.

Over 10,000 CTA holding addresses

- 1-4. Completion of season.1-0 peripheral products.
- 1-5. Completion of season.1-0 NFT.
- 1-6. Building DISCORD community.
- 1-7. Designing peripheral gift packages to reward partners who have participated in the community up to this point.
- 1-8. Improvement of DISCORD construction.
- 1-9. Perfecting basic blockchain information medium and integrating it into the DISCORD community.
- 1-10. Completion of multiple online theme events for season.1.

Over 100,000 CTA holding addresses

- 1-11. Completion of season.1-1 peripheral products.
- 1-12. Data integration, preparing to enter R2 stage.

【 R2 】

- 2-1. Recruitment of new team members and the second chapter's narrative theme, and conducting related preparations.
- 2-2. Completion of listing CTA on TXBIT, XeggeX, and other CEXs.
- 2-3. Completion of season.1-2 peripheral products.
- 2-4. Holding season.1 offline event.

Over 500,000 CTA holding addresses

- 2-6. Completion of listing CTA on more DEXs and CEXs.
- 2-7. Completion of more online theme events for season.1.
- 2-8. Publication of the second chapter's narrative theme.
- 2-9. Completion of season.2-0 peripheral products.
- 2-10. Completion of season.2-0 NFT.

2-? Subsequent development will revolve around the narrative theme of the second chapter.

Economic Model

The team will reserve 9% of CTA tokens for charity assistance projects, 1% for genesis airdrop, 25% for initial operation funds, and the remaining 65% will be used to create liquidity pools in various DEXs and list on CEX exchanges.

- **Genesis Airdrop** - **1%**
- **Charity Fund** - **9%**
- **Initial Operation** - **25%**

(Our team every withdrawal of funds is only carried out on the DEX, with a maximum limit of 5% each time.)

- **DEX** - **60%**
 - Uniswap - 30%
 - Pancakeswap - 30%
- **CEX** - **5%**

Total - **100%**

Token Total supply: 100000000

Our economic model is part of the core development strategy. We believe that a successful project should not just rely on virtual speculation, but should be built on the foundation of actual value. Therefore, we will dedicate ourselves to create real-world application scenarios for CTA and form a healthy value cycle through the joint efforts of community participants, product advocates, and the project team.

CTA does not set any taxes, it has no whitelist/blacklist functionality, no modification or upgrade features. It will be extremely simple, transparent, and easy to understand.

CTA's operation mode is also unique. CTA does not have any presales or seed rounds, the project will rely entirely on physical products and other channels for operational funds. The team is committed to creating real-world application scenarios and tangible value for CTA. Ultimately, we hope that CTA can form a cycle among community participants, product advocates, and the project team, where the value of CTA comes from its real value, not virtual speculation.

If any large institutions are optimistic about CTA, we greatly appreciate your affirmation, but we cannot directly provide CTA to you in order to ensure the future development of CTA's economic model. However, we look forward to your support in other modes.

Team

Currently, we only have five members. Although our project team is small, our enthusiasm for the project and our pursuit of innovation are no less than any large organization. We believe that only through firm conviction and close cooperation with the community can CyberTrashAnimal (CTA) achieve fruitful results.

Whether you are looking to invest, seek cooperation, or simply want to understand our project, we eagerly anticipate communicating with you. CyberTrashAnimal (CTA) has an open and friendly community, and it is this openness and diversity that attract participants from around the world to work together for this project.

In addition, we are also looking forward to more professionals joining the team. Regardless of your field of expertise, as long as you have ideals and passion, we eagerly anticipate your participation. We believe that only the diversity and professionalism of the team can take CyberTrashAnimal (CTA) to the next level.

At the same time, we welcome other blockchain projects or businesses to cooperate with us. In this highly competitive market, we believe that only through cooperation can we achieve mutual benefit and create greater value together.

Yes, this is indeed not a typical white paper. However, our goal is not just to create a blockchain project, but to create a movement with profound influence, a community that can change people's perception of failure and derive growth and transformation from it. At CyberTrashAnimal, we embrace failure and see it as the starting point for growth.

We hope that this white paper will not only let you understand our project, but also understand our spirit and philosophy. Because in our view, a successful blockchain project is not just the application of technology, but the expression of philosophy and culture. Through this white paper, we hope to attract people who share our philosophy to join us and strive for our common goal.

In the white paper, we have detailed descriptions of our objectives, development plans, economic model, and operational methods, which are all elements of a traditional white paper. However, we also include some less traditional elements, such as core philosophy and values, and our emphasis on community participation. These elements may not be visible in many white papers, but they are very important to us. Because we believe that these elements are the key to the long-term development and success of the project.

THIS IS A PARADISE FOR FAILURES.

THIS IS A HELL FOR FAILURES.

WE FACE FAILURE HERE, RELYING ON EACH OTHER.

WE SHARE FAILURE HERE, ABSORBING GROWTH.

YES, I AM A FAILURE.

BUT SO WHAT?

I NEVER GIVE UP.
