The background of the slide is a composite image of space. On the right, a large portion of the Earth is visible, showing blue oceans and white clouds. In the center, a thin crescent moon is seen against the blackness of space. A satellite with solar panels is visible in the upper left. The bottom portion of the image shows a lunar surface with rocks and shadows, suggesting a moon landing or exploration scene.

Introduction

MN Bridge is a revolutionary crypto-gaming ecosystem built on a bridge platform that connects web2 games to the growing blockchain space. By leveraging its in-house developed play-to-earn game, NFT marketplace, and a unique off-chain game token (MNP), MN Bridge offers game developers, gamers, and investors a seamless and efficient gaming experience. In addition, MN Bridge incorporates cutting-edge artificial intelligence (AI) technology to enhance the platform's functionality and provide users with personalized experiences.

In this whitepaper, we will present the key components of the MN Bridge ecosystem, including the innovative off-chain game token MNP (Moon Nation Points) and its applications.

MNB Token

MNB token is the multichain native token of MN Bridge. -Is used to buy Moon Nation Points (MNP), which serves as the currency for all existing and future games integrated into the platform. MNP is unique in that it is not a blockchain-based currency, and it maintains a constant value of \$0.01 USD per MNP.

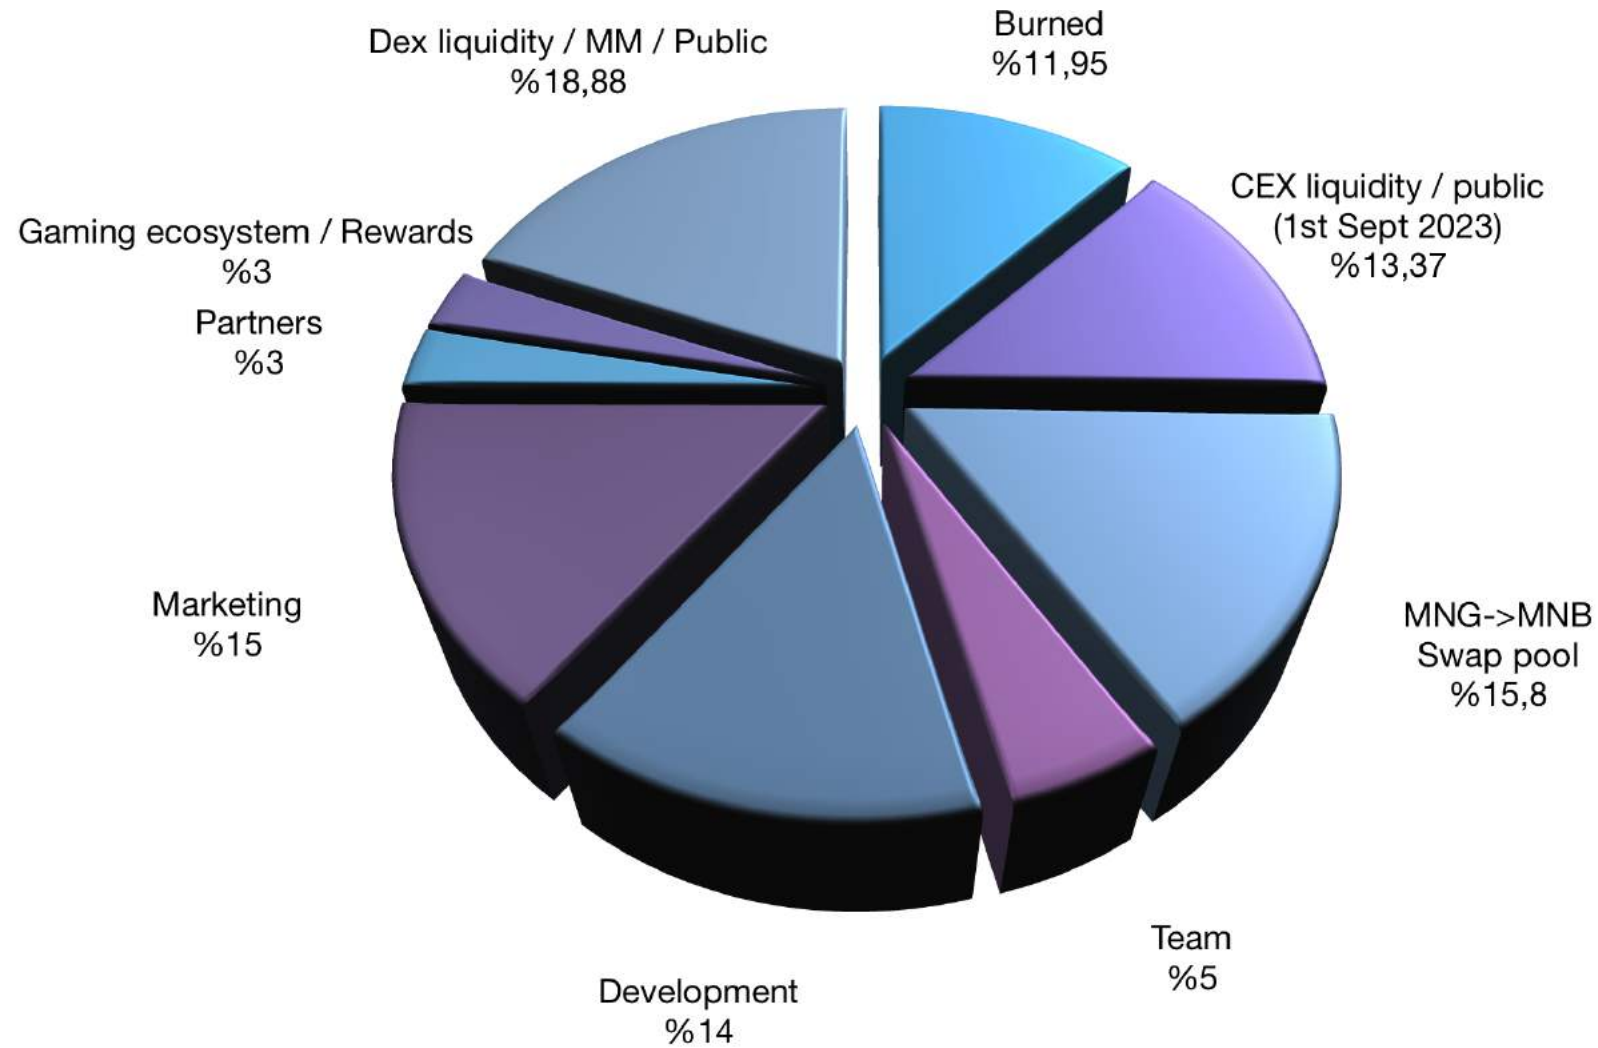

Total Supply: 1,000,000,000 tokens

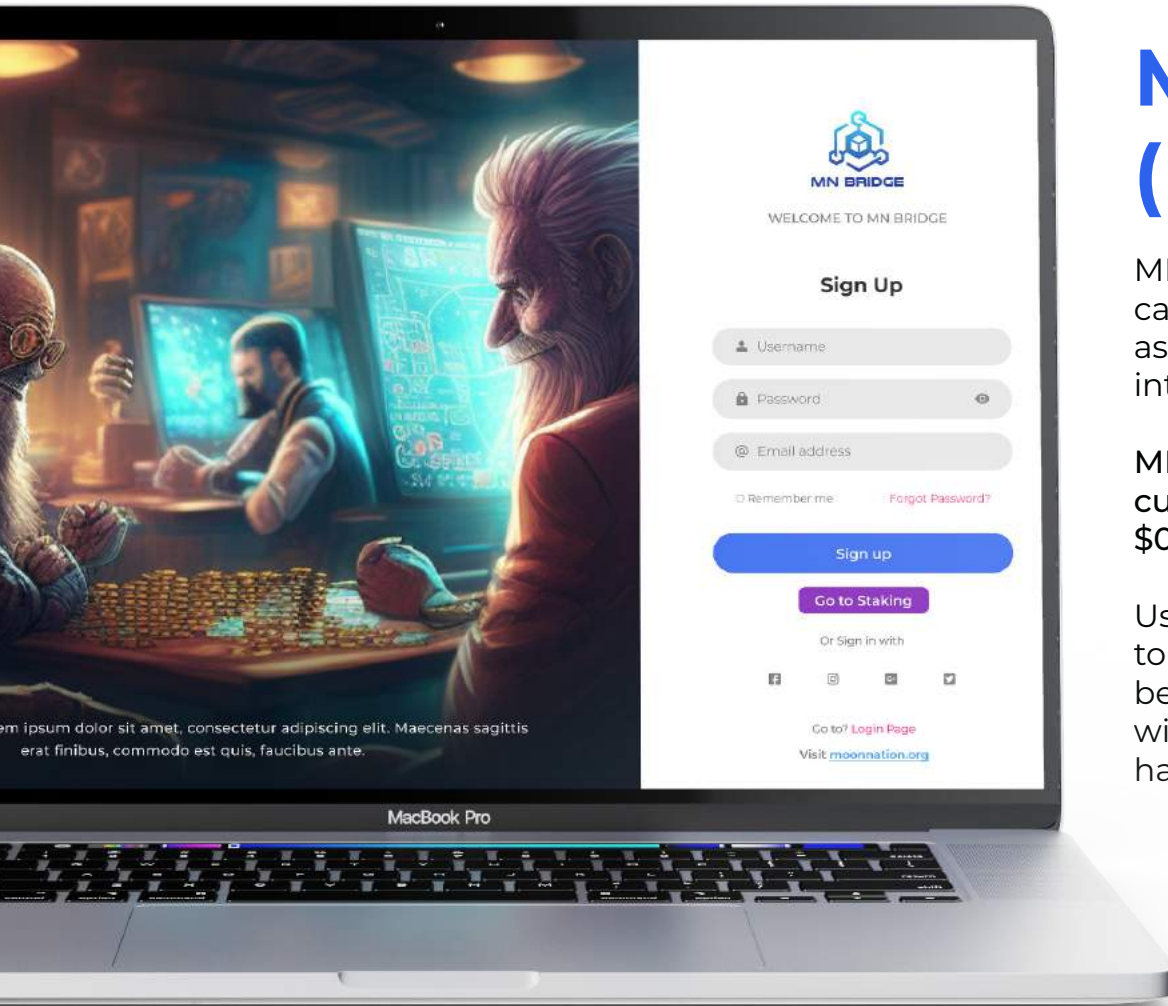

Burned Supply : 119,554,975 tokens

Circulating Supply : 880,455,025 tokens

Allocations

Moon Nation Points (MNP)

MN Bridge introduces an off-chain game token called Moon Nation Points (MNP), which serves as the currency for all existing and future games integrated into the platform.

MNP is unique in that it is not a blockchain-based currency, and it maintains a constant value of \$0.01 USD per MNP.

Users can only purchase MNP using the native token MNB, and MNP can be transferred instantly between users on the MN Bridge platform without any fees, even if the recipient does not have a blockchain wallet.

Benefits of MNP

High-speed, fee-less in-game transactions:

Blockchain transactions are slow and require gas fees, making them ill-suited for fast-paced gaming experiences. By transitioning from blockchain to off-chain with MNP, MN Bridge eliminates in-game transaction fees and delays, providing a seamless gaming experience while maintaining the convenience and anonymity of using cryptocurrency as funds.

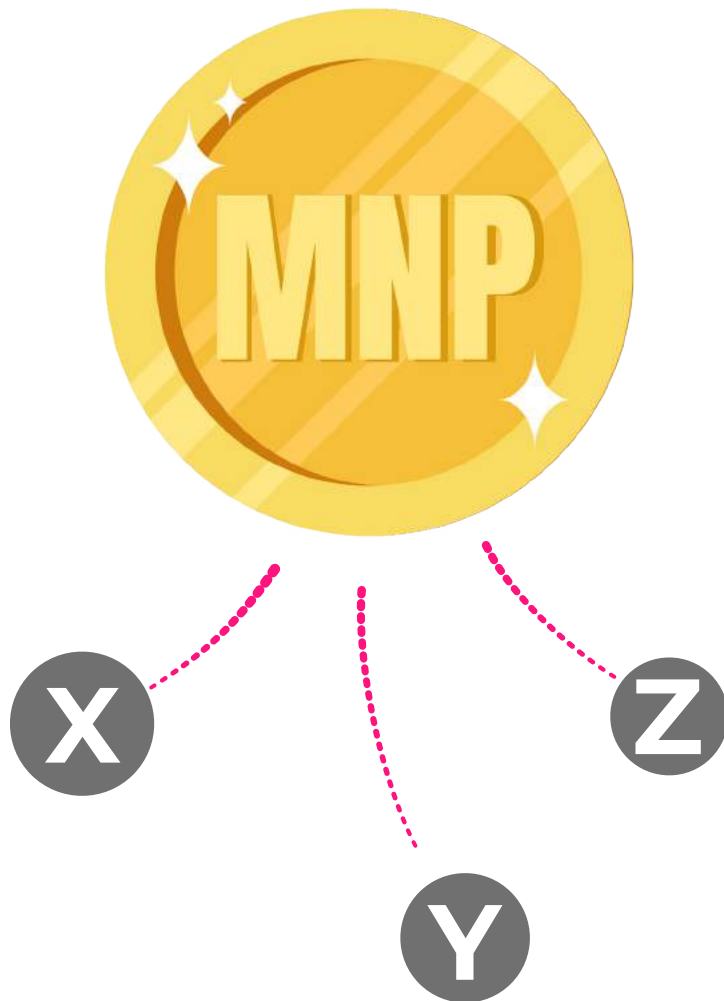

Easy adoption for non-crypto users:

MNP makes it simple for users who may not have a blockchain wallet to join the MN Bridge ecosystem. They can easily receive MNP from friends or family to kickstart their play-to-earn journey without needing to set up a wallet or understand the intricacies of blockchain technology.

Enhanced user experience:

MNP allows for smooth and instant transactions between users, creating a frictionless gaming experience that encourages collaboration and sharing within the community. This can help to attract and retain a larger player base on the MN Bridge platform.

Cross-game compatibility:

As the currency for all existing and future games within the MN Bridge ecosystem, MNP allows for seamless integration and compatibility across various gaming experiences. This fosters a more cohesive gaming community and encourages users to explore different games on the platform.

Greater flexibility for game developers:

By integrating MNP, game developers can focus on creating engaging gameplay without worrying about the technical challenges of integrating blockchain transactions. This can help to attract a wider range of game developers to the MN Bridge platform, resulting in a diverse and robust gaming ecosystem.

Integration with the MN Bridge Ecosystem

MNP is an integral part of the MN Bridge ecosystem, working in conjunction with other components such as the in-house developed play-to-earn games, NFT marketplace, and the native token MNB. The platform offers a comprehensive suite of tools and services for game developers to easily integrate MNP into their games, streamlining the process and reducing the barriers to entry for blockchain gaming.

In addition to the benefits offered by MNP, the MN Bridge ecosystem provides value through:

MN Bridge platform offer developers new ways to monetize their games, reaching new audiences and driving demand for MNP (Moon Nation Points) and MNB tokens.

NFT marketplace:

The MN Bridge NFT marketplace allows gamers to collect, trade, and sell unique and rare in-game items, adding value to their gaming experience and further driving demand for MNB tokens.

**Developer support:**

MN Bridge offers comprehensive support and resources for game developers, providing them specially tailored API's to help them to integrate MNP and other platform features into their games with ease. This fosters a collaborative and innovative gaming ecosystem.

Scalability and future growth:

The MN Bridge platform is designed to scale with the growth of the gaming industry, ensuring that the ecosystem remains robust and able to accommodate new developments in gaming technology, such as virtual reality (VR) and augmented reality (AR).

Integration with AI

MN Bridge incorporates advanced AI technology to enhance the platform's functionality and provide users with personalized experiences. The platform utilizes AI algorithms to analyze user data and behavior, providing insights that can be used to improve the platform's functionality, enhance user experiences, and deliver personalized recommendations and offers to users.

Benefits of AI Integration

Personalized recommendations:

By analyzing user behavior and preferences, AI technology can deliver personalized recommendations for games, in-game purchases, and other offerings, enhancing the user experience and driving engagement.

Improved platform functionality:

AI algorithms can analyze platform usage data to identify areas for improvement, such as optimizing game mechanics or improving the user interface. This can help to create a more seamless and intuitive user experience.

Enhanced security:

AI-powered security measures can detect and prevent fraudulent activity, safeguarding user data and funds. Real-time analytics: AI technology can provide real-time analytics, allowing MN Bridge to respond quickly to changes in user behavior and adjust the platform accordingly.

Fraud detection and prevention:

AI can be used to detect and prevent fraud, cheating, and other forms of unethical behavior in online gaming. Efficient matchmaking: AI can be used to efficiently match players with similar skill levels and preferences, leading to more balanced and enjoyable gameplay.

Predictive analytics:

AI can be used to analyze player data to identify patterns and trends, which can be used to make predictions about future player behavior and preferences. This can help game developers create more targeted and effective marketing campaigns.

Dynamic game mechanics:

AI can be used to create dynamic game mechanics that can adapt to player behavior and skill level. This can make the games more challenging and rewarding.

Our Inhouse Developed Games

MOON NATION

Overview:

Moon Nation is a thrilling space-based MMORPG that offers players a vast open-world set on the Moon, covering 16,000 square meters of play area! Players will fight aliens, other players and monsters, and complete quests for rewards. The game is available for download on PC and will soon be launching on the MN Bridge platform in the Google Play Store and will be played cross platform. Moon Nation offers players the opportunity to invest MNP to ingame sources and earn MNP competing other players on leaderboards.

Gameplay:

Within this immersive game, players will engage in a dynamic environment where they can hunt or be hunted, survive, thrive, and ultimately conquer.

As players navigate the lunar terrain, they can own a range of weapons, vehicles, and spaceships to enhance their exploration and gameplay experience. Moon Nation also offers a robust crafting system, providing players with the tools to thrive and survive in the harsh lunar environment.

To accelerate character development and leaderboard success, players have the option to purchase in-game items. Additionally, future updates will introduce NFTs, enabling players to acquire advanced characters, weapons, vehicles, spaceships, and more.

With its captivating gameplay and cutting-edge features, Moon Nation offers an unforgettable gaming experience that will keep players engaged for hours on end.

Leaderbord Rewards

Players who place in the top 20 on any of the Leaderboards are entitled to great rewards, including:

“God Amongst Men”

Longest Player vs Player kill streak!

“The Maze Runner”

Fastest time to finish the maze quest at the Meteor dome. You will need your own spaceship to reach this point

“I am the Space King”

Most Player vs Player kills. The only safe places are within cities. Leave and it’s an all out warzone!

“The Space Hunter”

Most Alien/Monster kills!

Daily Bosses

Players can find and kill the Ape-like boss “Belzerg” or the intelligent extraterrestrial being “Irith” to earn MNP based on their contributed damage. Daily bosses respawn 24 hours after they are killed.

Weekly Bosses

Players can find and kill the mutant boss “Tyrant”, the giant crab-like creature “Claw”, or the creepy “Pentachnid” to earn MNP based on their contributed damage. Weekly bosses respawn 7 days after they are killed.

Monthly Boss

Players can slay the legendary creature “Dreadnought” to earn MNP rewards based on their contributed damage.

*Rewards are via our MN Bridge game currency MNP (Moon Nation Points) which is a stable currency that ensures players are protected from the volatility of the crypto market. This will ensure earnings of players will NEVER result to price dumps

*These earning mechanisms will continuously be assessed and adjusted as necessary to keep on improving the economy and attractiveness of the game. Other earning will also be introduced in the future as the game development and improvement

THE LAST STAND

Introduction

The Last Stand is a 3D shooter survival game where players are tasked with defending the last stand base on the moon against waves of alien attackers. As the waves of aliens get progressively harder, players must use their wits and strategic thinking to survive for as long as possible. The game is fast-paced, engaging, and rewards players for their competitive nature. The longer a player survives, the higher they climb on the leaderboard and the more weekly MNP (Moon Nation Points) prizes they are eligible to win.

Gameplay

Players start off in the last stand base. As the game progresses, waves of aliens start attacking the base from both the ground and air. The objective is to defend the base for as long as possible while taking down as many aliens as possible. The game features a range of weapons that players can unlock and upgrade using MNP's..

Players can also purchase medikits to partially heal themselves when they take damage from alien attacks.

The medikits can be purchased using MNP's, As the waves of aliens get harder, players must use their strategic thinking to survive. Players can reposition themselves in the base to avoid taking hits and run away if they have to.

Leaderboard and Rewards

The game features a leaderboard where players can compete against each other to see who can survive the longest. The longer a player survives, the higher they climb on the leaderboard. Each week, the top players on the leaderboard are eligible to win weekly MNP prizes. These MNP prizes can be used to purchase more powerful weapons, medikits, and upgrades or to cash out as MNB token on blockchain.

The Last Stand is a fun and engaging 3D shooter survival game that is sure to keep players on the edge of their seats. With its fast-paced gameplay, strategic thinking, and competitive leaderboard, The Last Stand is a game that players will want to keep coming back to. The game's unique setting on the moon and the wave-based attack system make it stand out from other shooter games in the market. So, download The Last Stand now and see how long you can survive against the alien invaders!

MN Bridge governance token (MNG) will empower the community to participate in important decisions about the game's future. By giving token holders the ability to propose and vote on changes to the game's ecosystem, we are creating a more democratic and transparent governance system that aligns with the community's interests. We believe that MNG will enhance the game's ecosystem, increase community engagement, and create a more immersive and rewarding gaming experience for all players.

To further enhance the value proposition of MNG, we are pleased to announce the implementation of an automatic burn mechanism that will be connected to our new multichain main token, MNB. This mechanism will trigger the burn function on MNG with each MNB transaction, resulting in continuous deflation of the MNG token supply. This feature is designed to increase the scarcity and value of MNG tokens, thus providing investors with an even more compelling investment opportunity.

In addition to the aforementioned benefits, as part of our commitment to creating value for our community, MNG token holders will be eligible for an airdrop of 20% of the total investment MNG guarantees in each funding round. This airdrop will be distributed to MNG holders based on the size of their holdings in proportion to the total supply of MNG.

MN Bridge will introduce various new staking pools that will allow MNG token holders to stake their tokens and earn rewards for supporting the network. These pools will offer different staking options and rewards depending on the length of the staking period and the amount of tokens staked.

we aim to incentivize long-term holding and reward our loyal community members for their continued support of the Moon Nation project. This feature is unique to the Moon Nation ecosystem and demonstrates our commitment to creating value for our community.

Overall, we believe that the combination of MNG's low total supply, staking, automatic burn mechanism, and guaranteed investment airdrop, make MNG a compelling investment opportunity within the cryptocurrency market. As we continue to expand and innovate within the Moon Nation ecosystem, we are confident that MNG will remain a valuable asset for investors and users alike.

Roadmap

1

Launch of chain swap bridge app

Contract deployment on Ethereum & BNBChain

Listing in MEXC

Sign contract with high tier marketing team

Contract deployment on Base Chain

2

New MN Bridge app launch on web

New MN Bridge app launch on mobile platforms

MN SAGA: The Last Stand new play to earn game launch on mobile platforms

CEX listings

3

Integration of MNB to decentralised banking system; Chains Card

Web3 advertising collaboration for MN Bridge platform and in-house games

Gaming tournaments with gaming guilds

4

Onboarding 3rd party web2 games

New roadmap release for 2024

Revenue Model

Our project generates revenue through multiple streams, including taking commissions from third-party games, running advertisements on the bridge platform, earning swap fees, and more.

Firstly, we take commissions from third-party games that integrate with our platform. These games will be able to use our bridge to enable cross-chain transactions and connect with players on other blockchain networks. In exchange for providing this service, we charge a commission fee from the game developers, which generates revenue for our project.

Secondly, we run advertisements on our bridge platform, which also generates revenue for our project. Advertisers can pay us to display their ads to our users, and we earn revenue based on the number of impressions or clicks generated by these ads.

Finally, our revenue streams may expand as we continue to develop and improve our platform. For example, we may explore other ways to monetize our user base, such as offering premium services or selling data to third-party companies.

Additionally, we also earn swap fees from users who trade cryptocurrencies on our platform. Every time a user makes a swap, we charge a small fee that is collected and added to our revenue pool. These swap fees can add up quickly, especially if the volume of trades on our platform is high.

In summary, our revenue model is based on a combination of commission fees from third-party games, advertising revenue, swap fees, and other potential revenue streams that may arise as we continue to develop our platform. By diversifying our revenue streams, we can ensure a stable and sustainable source of income for our project, which in turn benefits our \$MNG token holders.

MN BRIDGE
WHERE GAMING MEETS WEB3 INNOVATION

Conclusion

MN Bridge is poised to revolutionize the blockchain gaming industry with its unique off-chain game token, Moon Nation Points (MNP), and comprehensive ecosystem. By providing a seamless, high-speed, and fee-less in-game transaction experience, MN Bridge can drive innovation in the gaming industry while offering a solid investment opportunity for those interested in.
