# INTRODUCING WORLD PAY

- With the shortfalls of some Protocols, such as node Protocols that lock your initial investments and excessively high APY Protocols that flood the market till everyone ends up holding the bags. The concept of rewarding token holders in Peer-to-Peer protocols is taking the crypto world by storm, and World Pay is at the forefront of this trend with its cutting-edge approach to incentivizing its token holders.
- The World Pay token is a decentralized cryptocurrency built on the Binance Smart Chain (BSC) with a smart contract that makes it safe to use and beneficial to hold. A purely peer-to-peer version of electronic cash would allow online payments to be sent directly from one party to another without going through a financial institution.
- We'll remain anonymous at first and then dox afterward. We hope that this token will become a community-driven token. We will pass it over to the community holding it once it has enough organic growth to support it. Making it a genuine dao. We propose a solution to the double-spending problem using a peer-to-peer network.

# OUR MISSION

- This token will evolve into a community-driven token that will be transferred to the community holding , once it has achieved sufficient organic growth to support it. We're about to turn it into a true dao.
