FAQ

Introduction

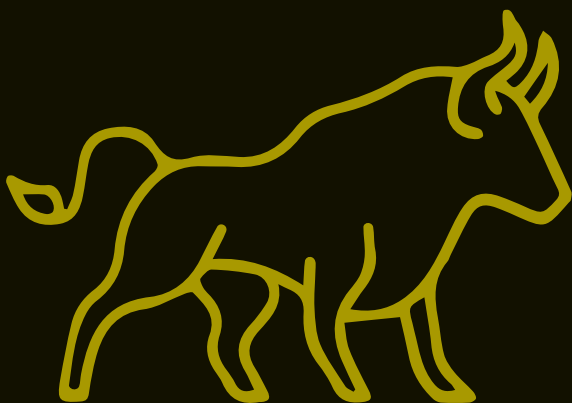

Tr8bit, powered by smart contract technology. DeFi (Decentralised Finance) keeps gaining traction over time and most people are choosing it as an option to centralized solutions. However, operating trustlessly is hard. It becomes even harder for DAOs and financial institutions that manage large funds and cannot trust third parties with them. The growth of DAOs has been exceptional over the last few years. With DAOs gaining popularity, many of them started wondering how they could maximize their funds while building healthy and sustainable liquidity for their token.

Steve (founder) quickly realized this was the beginning of something huge and went to work with his ideas. With his skills and business mindsets together to create real life problem solving ideas to help the holders and benefit all crypto users in the sometimes confusing world of crypto. Every utility on the roadmap of Tr8bit is created and born from experiences we had in the crypto and businessworld. Steve has a lot of experience in trading and running successful businesses invarious multinationals where he has proven himself everytime again an proving his skills.

Tr8bit will make the bridge between real utilities and the crypto world to make all our holders financially independent. Our team of experienced technical and business experts are dedicated to creating useful and unique apps for mass adoption and bringing unique products to the masses.

TR8BIT was born!

- AI trading crypto bot
- Claiming platform rewards + staking + swap
- investment tracker
- 0% token - governance token
- opening first clothing shop and own brand
- Luxury booking platform
- Headquarter Dubai
- ...

Vision & Mission

We are determined to continue pushing boundaries and making an impact in our community. Let's take a look at what's our vision and mission is for our future.

VISION

Revolutionary Auto Income Generator

The core to any successful meaningful project is utility, and Tr8bit plans to have this in spades. We have all experienced the volatility of the crypto market and the many months when volume is low, investment dries up, more people take profits from the project and reflections are low.

Tr8bit solves this problem!

MISSION

Our mission is to create more economic freedom in the world.

Tr8bit has 1 BIG mission. Give rewards to our holders. If you now a top holder or a small holder. Every holder is important for a project and we gonna solve that problem and give rewards, good rewards to everyone.

We aim to make users independent and enjoy the full rights and freedom without restrictions in their lives. With this purpose of creation, we make users feel safe and we are building something to secure the investments of users.

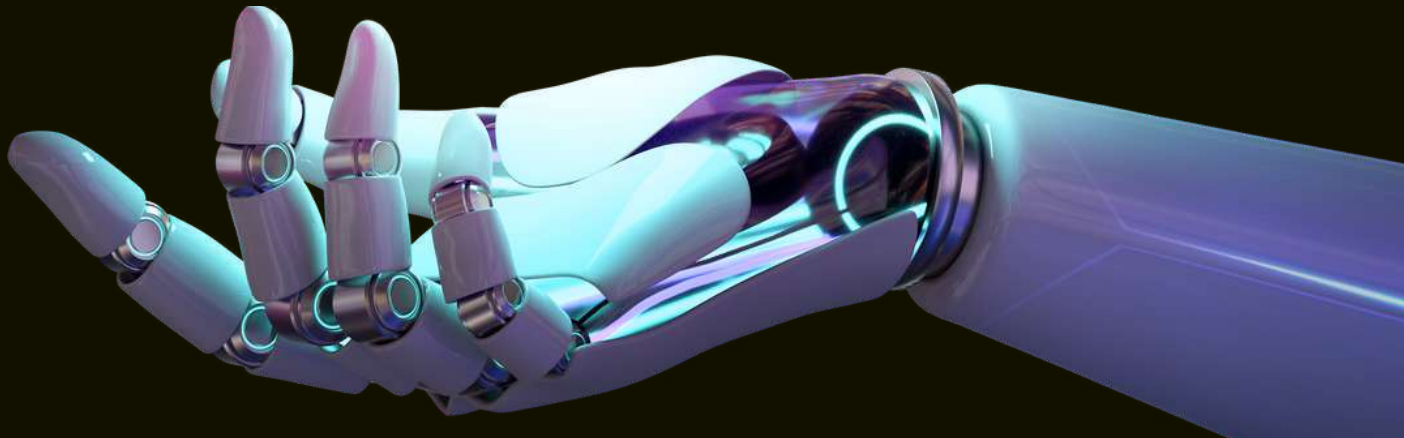

We define economic freedom as the ability to make choices with respect to one's personal resources, unencumbered by trusted third parties or borders or lack of access. We believe economic freedom is the foundation of peace and prosperity, and by creating more of it for people, we are reducing suffering in the world. We strive to help everyone, everywhere be more economically free.

WHAT WE DO?

Tr8bit is a deflationary token designed to become more scarce over time. Tr8bit holders will earn USDT that is automatically sent to your wallet by simply holding Tr8bit coins in your wallet. Watch the amount of USDT grow in your wallet. Every holder will automatically receive 3% rewards from every buy and sell transaction.

Be prepared for financial freedom. We have a massive roadmap that we want to achieve. Everything we want to realize, there is a plan for.

We are dedicated to creating a coin which is revolutionary and we are doing everything we can to show you our commitment.

1. AI TRADING CRYPTO BOT

2. INVESTMENT TRACKER

3. LUXURY BOOKING PLATFORM

4. GEOSOCIAL MEDIA PLATFORM

- Biggest burn event ever!
- Start development Geosocial media platform (unique in the world)

Q4 - 2024

- Launching Tr8bit ventures
- Start development prepaid card app
- Special win games

Q1 - 2025

- DAO location voting for opening our first shop with our own fashion brand
- Open our headquarter in Dubai
- Start development crowdfunding app

Q2 - 2025

- Start development of our messaging and to-do app

Q3 - 2025

- Biggest burn event in crypto history

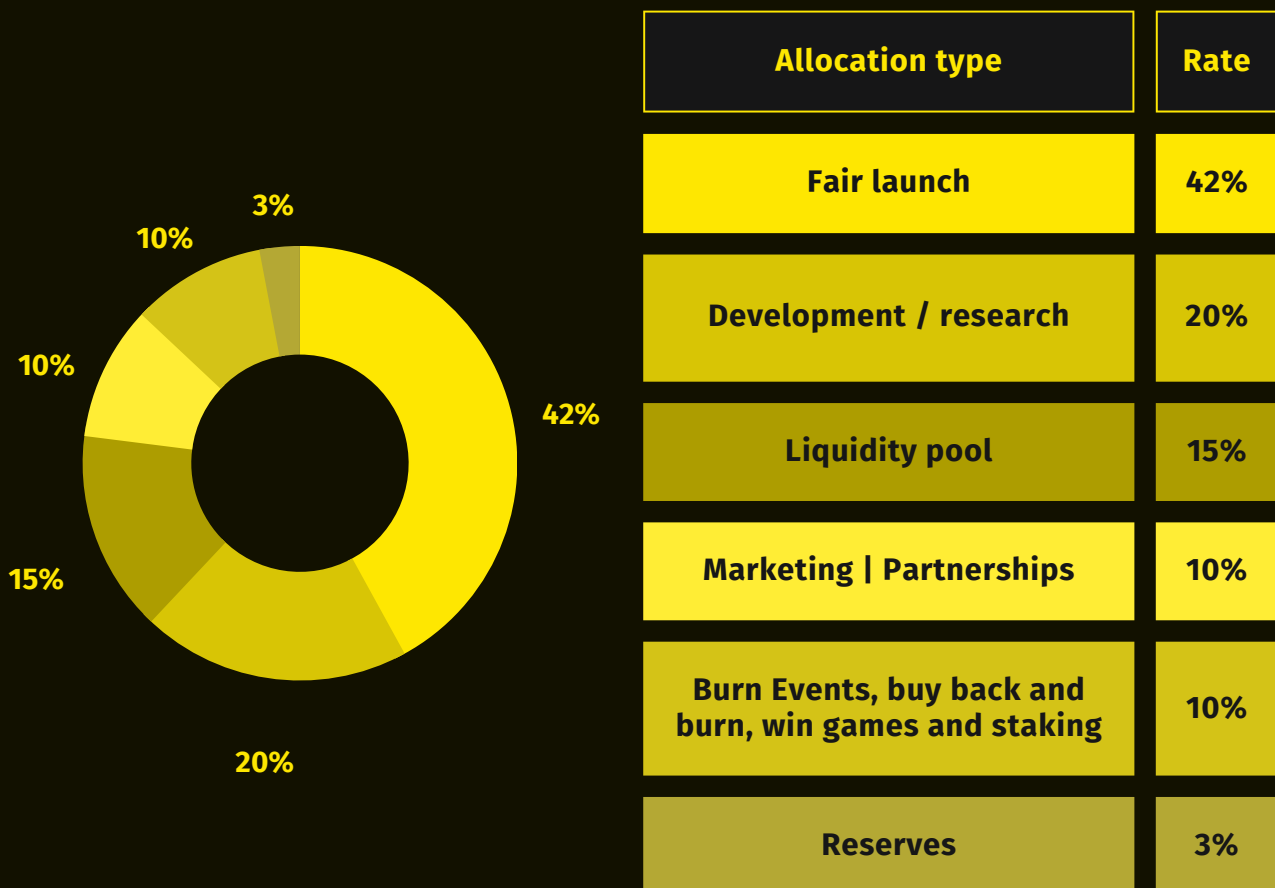

Q4 - 2025

- Make a new roadmap for the future

TOKEN ALLOCATION

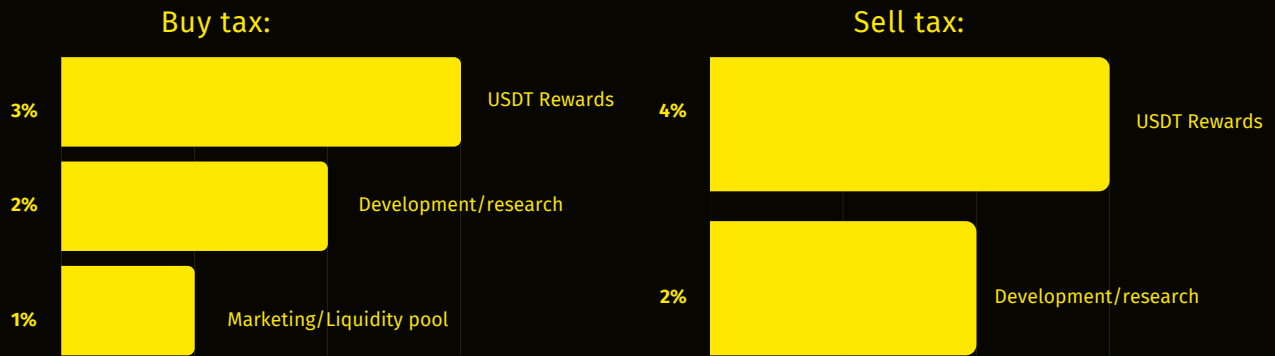

Token name: Tr8bit
Token symbol: Tr8
Token decimals: 18
Token Blockchain: BSC
Token total supply: 25,000,000,000

There were 25,000,000,000 Tr8bit (Tr8) initially created on the Binance smart chain, and this is also the max token supply. The total supply will however decrease to 1,000,000,000 tokens as the core of the token development system is reward diamond hands and burning a huge amount of tokens. These tokens were allocated as follows:

TOKEN TAX

Transaction fees (6%) from buying and selling \$TR8 help support the development of our big ecosystem, generates passive income for our loyal holders and used to stabilize the price. Once launched the utilities we will be airdrop 100% of all net profit to all our holders. This will give great rewards for all holders.

Our Target

Here are some of the targets we will achieve in 2024:

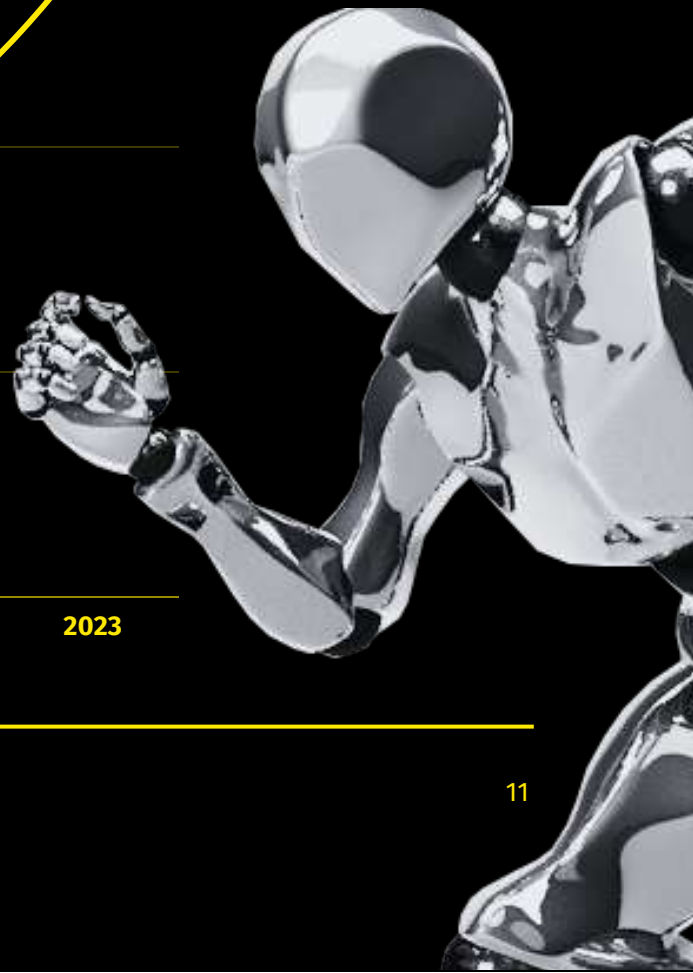

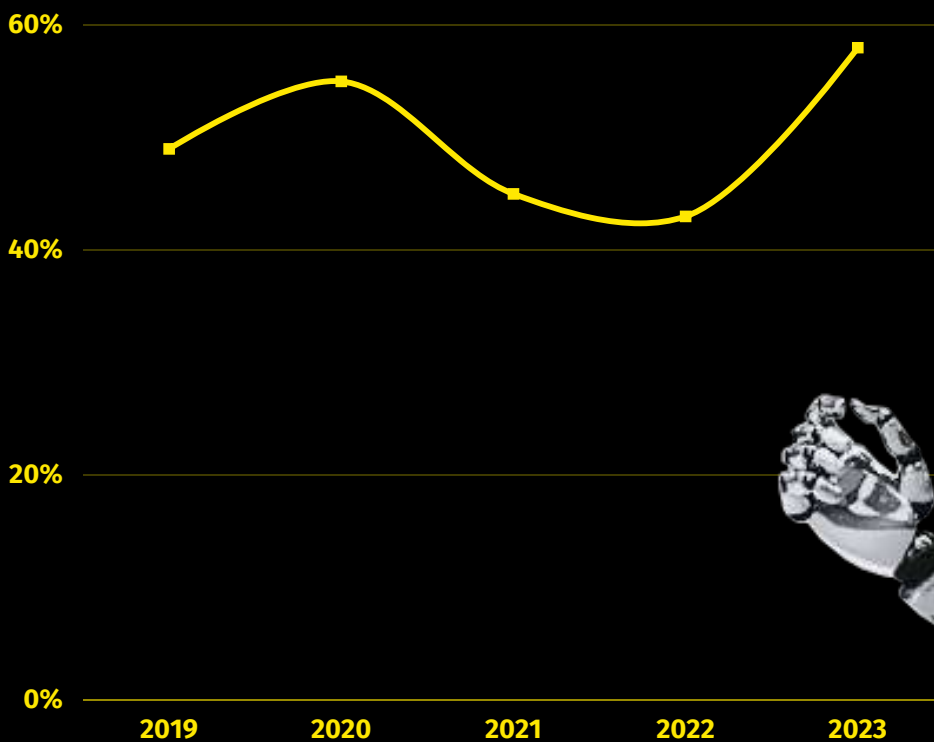

- Min. 45% Overall profit on our trading strategie
- Top 100 coin
- 50 000 holders
- New BIG partnerships
- Give economic freedom to holders

Chances of success

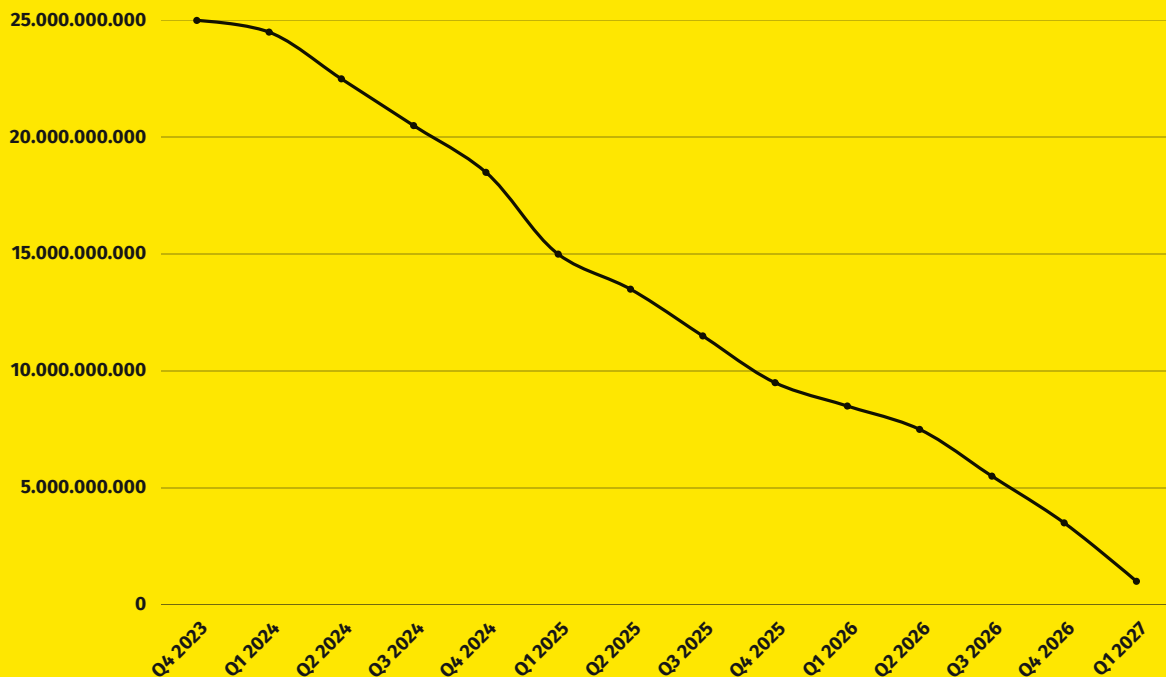

Because of our proven record, our chances to succes is 100%. With great ideas and the best development and marketing team we gonna have a huge impact in the cryptoworld. For everything we have lined up is a plan. We are here for the future! Just hold and relax and follow us on our journey. Our journey to financial freedom.

Profit Chart

This is the profit chart of the last 5 years of our trading strategie. We are 100% transparant about the results we achieve

BUY BACK AND BURNS

STRATEGIC BURNING

If you are familiar with reward token projects, you will know that most offer a Buyback & Burn (BB&B) function. Unfortunately, this function is rarely effective and can sometimes actually have an adverse effect on the chart. Tr8bit will employ a huge strategic BB&B mechanism.

Our buyback and burn program is the way for a cryptocurrency company to reduce the overall supply of its token. The process involves the company buying back a certain amount of its tokens from the market and then “burning” or destroying them. This reduces the token’s total supply, which can increase the value of the remaining tokens by decreasing the supply and increasing the demand for the token.

OUR UTILITIES/DAPPS

We have a big roadmap and unique products that we gonna launch the coming years. We are here for all our holders, small and big. Follow us what we will develop and what we will achieve. We just want to reach the top. Nothing less! We are only going to deliver the best quality and our holders will decide how we should manage tr8bit. Each holder will be able to vote through our dao voting platform
