What is Warhamster 4K?

Warhamster 4K is a crypto NFT project that takes a satirical, fun approach to the Warhammer 40K universe. The token will be launched months before the NFT collection so the community can grow their bag before the collection launches.

Warhamster 4K Token

Our token is the generic pump.fun token that millions of other projects use. It isn't original, offers no rewards, and is immutable. The only thing that makes it unique is the community and universe that we create.

Warhamster 4K NFTs

Our NFTs are designed and built around Trading Card Game(TCG) mechanics. Every NFT has stats, rules, and information on the NFT.

Warhamster 4K NFT Game

If the token and NFT collection become a popular product we'll begin work on an online TCG DAPP for the Warhamster 4K universe.

How many NFTs will there be?

The first series will launch with 23,035.

	Tier	NFTs Per Char	NFTs Per Tier	Total Count
	S	1	5	5
	A	1	30	30
	B	10	50	500
	C	50	50	2500
	D	100	100	10000
	Land	100	100	10000
Total	6	262	-	23,035

How will Warhamster 4K be funded?

Out of pocket by the developer.

Who is the developer?

That's me! My name is Brandon, I'm a plumber from Florida, USA, and I enjoy Warhammer 40K, graphic design, and crypto.

My first project was in 2021 on the BSC chain. The token was called "Evagrow" and it reached a market cap of 10 million within 2 days. The token is still tradable, I've never touched the liquidity, and you can find it here.

Ever since Evagrow, I've been in love with the developer side of crypto.
